EM31Pro
Harmonic Equatorial Mount
USER MANUAL v2.0

EMCAN

www.emcanastro.com

Reading Tips

Reading Interpretation

Thank you for choosing EM31Pro Harmonic Equatorial Mount.

The manual is based on the factory default specifications. Therefore, some specifications or appearance of your instrument may be different. This manual is subject to change without prior notice.

The manual can still be used as a guide when there are differences in appearance or structure but no substantial differences in function or the use methods.

In order to ensure proper use of the equatorial instrument, please read this user manual carefully before starting to use

Symbol Description

⊘ forbidden   ⚠ Important points   💡 Operation instruction

Blue stands for counterclockwise rotation

Green stands for clockwise rotation

Reading Tips

⚠ Please install and use the mount in strict accordance with the steps and precautions reminded in this manual, operators shall be responsible for any damage to the equipment or personal injury caused by improper operation.

⚠ The operating temperature of this equatorial mount ranges from -15℃ to 40℃. Please use the equatorial mount reasonably under proper environmental conditions

⚠ After all devices are installed, check for the interference strictly and carefully. Collisions can cause damage to equipment components, causing the equatorial mount malfunction or affecting usage accuracy。 If any interference or other emergency situations are found, immediately unplug the power.

⚠ Please be careful when you carry, assemble or disassemble the main body and other heavy components and other equipments used on the mount . Or it may cause damage to the equipments or even personal injury.

⚠ Please be sure to place the whole equipments on solid and flat ground, Or the mount may fall over, which may cause damage to the equipment or even personal injury.

⚠ If there are children around when using, please pay attention to protecting their safety

⚠ Do not wipe the surface with corrosive liquid.

⊘ Unauthorized disassembly is strictly prohibited. If disassembled by oneself, the warranty is invalid.

Contents

Product Overview

The EM31 Pro Harmonic Equatorial Mount is a lightweight equatorial mount that uses harmonic reducers. EM31 Pro Harmonic Equatorial Mount, with three modes of German equatorial mount, side **altazimuth mount** and top **altazimuth mount**, can meet the needs of both astrophotography and sky observation, especially in outdoor environments, its small size and lightweight design can provide astrophotographers and astronomical observers great convenience for carrying and using. Meanwhile, its complete set of fast installation and speed adjustment design system can help users enter the shooting and observation state faster.

Product Overview

1. Weight of the main body： approx. 4kg (without Dovetail & adapter)
2. Payload： ≤15kg (without counterweight)
   ≤20kg (with counterweight)
Note: payload calculated in the condition that the the distance between telescope's central axis and the base of dovetail saddle is less than 100mm
3. Latitude adjustment： 0°~90° (micrometer adjustment +/-10°)
4. Azimuth adjustment： -8°~+8°
5. RA： harmonic reducer model 17 (reduction ratio 1:100)
6.DEC： harmonic reducer model 17 (reduction ratio 1:100)
7.Motor: 42 Closed-loop stepper motor
8.Goto speed： max 6°/s
9.Power port： DC5.5-2.1 (12v 5A)
10.Power consumption： tracking 0.4A， Goto 0.7A
11.Communication interface： usb2.0， wifi， Bluetooth
12.dovetail： Vixen 75° & LOSMANDY 60°； Arca(Optional)
14.Home position： by bubble levels
15.Mode： equatorial mode; Altazimuth mode (side &top)
16.Hand controller： Wired hand controller

⚠ The payload is not exactly equal to the total weight of the equipment to be loaded. The effective weight that the equatorial instrument can bear is closely related to the center of gravity position of the entire equipment, and the equipment with a high center of gravity will correspondingly offset the load-bearing capacity of the equatorial instrument.

Before installing heavy equipment with a high center of gravity, please refer to the EM31Pro load formula to confirm whether it is overweight.

Product Overview

## Packing & Accessories

The standard of the harmonic equatorial mount includes components and quantities as follows：

|		
1	EM31 Pro body	1
2	Hand controller	1
3	dovetail（VIXEN & LOSMANDY）	1
4	Front multifunctional bracket	1
5	Adapter	1
6	0.5m USB2.0 cable	1
7	2m USB 2.0 cable	1
8	Soft bag	1

Product Overview

1. Dovetail
2. DEC 12v DC 5.5*2.1
3. DEC Hand controller port
4. DEC USB port （type A）
5. Main altitude locking knob
6. Azimuth adjustment knob
7. Altitude fine adjustment knob
8. Auxiliary altitude locking knob
9. Bubble level for DEC axis
10. Bubble level for RA axis
11. Multifunctional front support
12. Counterweight bar interface
13. Mode indicator light
14. Mode switching button
15. Battery cover plate
16. USB （type A ）
17. Ball head interface
18. 12v DC 5.5*2.1 power port
19. Hand controller port
20. Telescope directional mark

Product Overview

Interface size

⚠️

The standard dovetail of EM31Pro can be replaced, and the installation dimensions of the dovetail are as follows:

EM31 supports counterweight bar with a diameter less than 20mm, and with length less than 300mm, the counterweight should be no more than 5kg

⚠️

The screw thread length of the counterweight bar shall not exceed 12mm

Product Overview

EM TC44S Tripod

RP200 Extension rod

AD120 Horizontal adjuster

Parameters：	
Tripod interface：85mm	**Locking method：three screws locked**
Carbon fiber tube diameter：44mm	**Tube thickness：2mm**
Storage length：	**620mm （EM-TC44S）**
Unfolded height:	**EM-TC44S 530mm**
	EM-TC44L 720mm
	EM-TC44U 810mm
Weight：	**EM-TC44S approx. 2.5kg**
	EM-TC44L approx. 3.3kg
	EM-TC44U approx.4.2kg

⚠ This accessory needs to be purchased separately

Product Overview

EMH150 Fast-assembling pier extension

Material: Aluminum(AL6061),
Stainless steel
Size: H150mm dia110mm
Weight: 1.2kg

⚠ This accessory needs to be purchased separately

Product Overview

Top-mounted mode supporting bracket

**Material:
Aluminum(AL6061),Stainless steel,
Titanium alloy(counterweight bar)
Size: L350mm
Weight: 1.8kg**

Suitable for binocular telescopes

⚠ This accessory needs to be purchased separately

Product Overview

Ball head mount adapter

Arca board strips

⚠ This accessory needs to be purchased separately

Product Overview

Adapter for QHY
Pole master

Adaptor for Ipolar
(Only applicable to
specific version)

⚠ This accessory needs to be purchased separately

Standard Use Procedure

Equatorial mount Mode

Install equipment

↓

Set time and location

↓

Set zero position

↓

Polar alignment

↓

Select target and Goto

↓

Using Target Calibration

↓

Come into use

⚠

The coordinates and time of the using site must be set correctly, and the zero position must be set correctly, otherwise it may cause target goto errors and even equipment collisions

Standard Use Procedure

Use Procedure

Zero position of Equatorial mount mode

The zero position of the German Equatorial mount is shown in the diagram below, and the telescope points to the North Pole
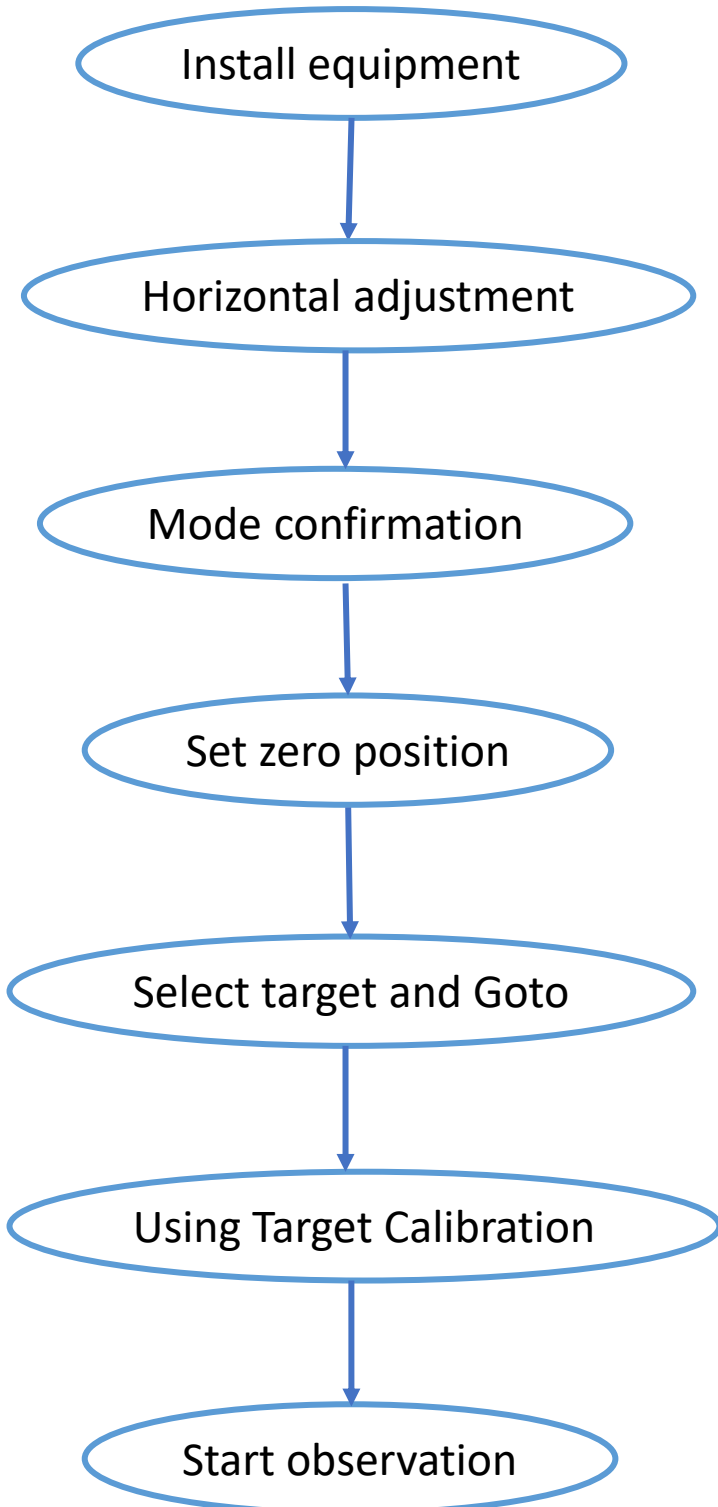

N

小熊座
Telescope

仙王座

EM31 Pro can confirm the zero position of Equatorial mount through RA and DEC axis bubble level

Standard Use Procedure

Use Procedure

Altazimuth Mode (side & top)

Install equipment

Mode confirmation
↓
Set zero position
↓
Select target and Goto
↓
Using Target Calibration
↓
Start observation

N

⚠️

The coordinates and time of the observation site must be set correctly, and the zero position must be set correctly, otherwise it may cause target goto errors and even equipment collisions

Standard Use Procedure

Zero position of Altazimuth Mode (side & top)

The zero position of the Altazimuth mode is shown in the diagram below, and the telescope points to the North Pole
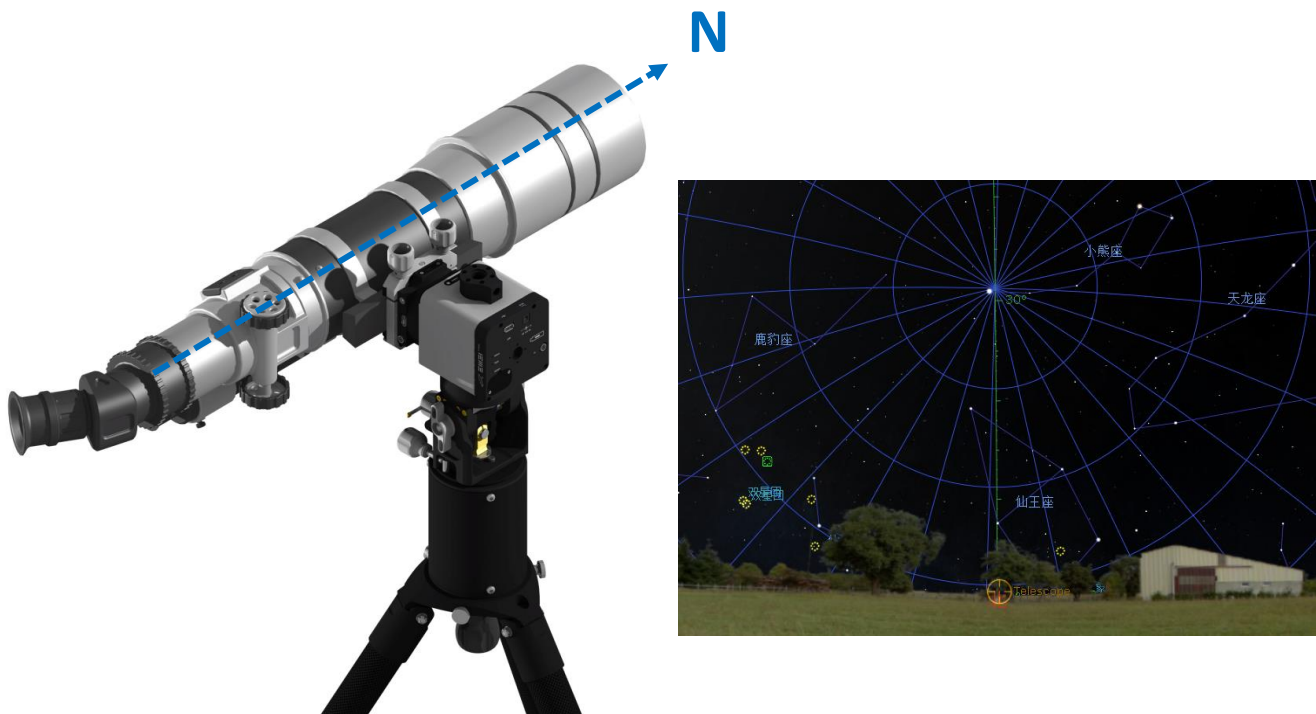

The initial zero position can be confirmed through a mobile compass and level

Installation and Use

EM 31 Pro can be installed on non central axis photographic tripod with a bore diameter of 85 mm.

Locking knob
**Locking knob**

Diameter 85mm

Installation and Use

Installation of equatorial mount with pier extension and tripod

Standard accessories for other tripod mounting are not officially available. If users need to mount the equatorial instrument on other tripods, they need to design and process the adapter and mounting bolts by themselves. **The dimensions need to follow the chart below：**

$\phi110$

Outer diameter less than 110mm

3/8-16 ▽ 12

Adapter

Screw

Wash

2

12

24

28.5

20

$\phi85 \begin{smallmatrix}+0.05\\0\end{smallmatrix}$

Correct adapter structure

Incorrect adapter structure, it is prohibited to connect to the equatorial instrument through only one plane

Installation and Use

Installation of equatorial mount with pier extension and tripod

When using the EM TC44 tripod, the equatorial mount body can be directly installed on the tripod through the adapter, and locked by the three knobs of the tripod to achieve more reliable connection.

Auxiliary locking knob

Tripod locking knob

Installation and Use

EM TC44S is a high load tripod specially designed for harmonic equatorial mount, in order to improve the rigidity of the tripod, it is designed as a non-retractable structure, and the height and supporting area of the tripod are expanded by installing the heightening section.

Rotate clockwise to install the extension rod and horizontal adjuster
Installation and Use

The harmonic equatorial mount is small in size. When a longer telescope is used, there is a problem of interference between the telescope and the tripod near the meridian. At this time, it is necessary to use the pier extension to avoid interference.

pier extension

interference

Installation and Use

Installation steps with the pier extension

Rotate the three auxiliary locking knobs of the tripod counterclockwise until the pier extension can be smoothly installed into the tripod tray

auxiliary locking knob

Installation and Use

Installation steps with the pier extension

💡

Gently Push up the main tripod locking knob and rotate it clockwise until the knob and pier extension cannot rotate relative to each other

⚠️

Note that if this step is not performed correctly, the equatorial mount body and pier extension will not be separated properly when disassembling the equipment.
main locking knob

Installation and Use

Installation steps with the pier extension

Place the equatorial mount body with the adapter into the pier extension
Installation and Use

Installation steps with the pier extension

Push up and continue to rotate the main tripod locking knob clockwise until it locks tightly

Rotate the three tripod auxiliary locking knobs clockwise until they lock securely

Up to now, the installation of the body, pier extension, and tripod is completed

Push

⚠️ **To lock the body, push the main locking knob upwards with slight force first before clockwisely rotating the knob**

# Installation and Use

Altitude coarse adjustment

Rotate counterclock wise to release the auxiliary altitude locking knob

Rotate the main altitude locking knob counterclockwise until the two pairs of flat gears are completely separated. At this point, the altitude angles can be freely adjusted
⚠ **When the main altitude locking knob is loosened, the body will lose its support. During the coarse adjustment process, be sure that there is always a hand to support the body until the main altitude knob is locked again**

Installation and Use

Altitude coarse adjustment

💡 Refer to the altitude scale, adjust the altitude angle to the approximate local latitude position. (For example, if the local latitude is 31°13'20 ", lock the altitude near 30 °)

⚠️

When the main altitude locking knob is loosened, the body will lose its support. During the coarse adjustment process, be sure that there is always a hand to support the body until the main altitude knob is locked again
⚠️

Roughly adjust the altitude angle at 10 ° intervals, such as 0 °, 10 °, 20 °, 30 °... 90 °

Installation and Use

Adjustment of altitude and azimuth angles of the German equatorial mount

Altitude coarse adjustment

💡 Rotate the main altitude locking knob clockwise at the rough latitude position until the flat gear engages again. Rotate the auxiliary altitude locking knob clockwise to complete coarse adjustment of the altitude angle

CORRECT

WRONG

⚠️

Note that the flat gear must engage correctly, as shown in the left diagram. Incorrect engagement may cause the equipment to slip

Altitude angle coarse adjustment completed

⚠️

When the main altitude locking knob is loosened, the body will lose its support. During the coarse adjustment process, be sure that there is always a hand to support the body until the main altitude knob is locked again
Installation and Use

Precise alignment of polar axis

1. For Astrophotography, polar calibration can be completed through plate solving
2. EM31 Pro supports the installation of Pole master or Ipolar to complete polar calibration

Adapter for electronic polar alignment scope

After all equipment installation is completed, precise calibration of the polar axis is completed by rotating the azimuth adjustment knob and altitude fine adjustment knob

Accessory Installation

Installation of dovetail

Dovetail

The interface on EM31 Pro DEC top plate is suitable for installation with most dovetails, users can replace the dovetail according to their needs

38

38

4-M6 ∇ 14
Accessory Installation

Installation of dovetail

Dovetail

EM31 Pro has a dovetail of LOSMANDY 60 °. Vixen 75 ° and Arca specifications can be achieved by installing the dovetail strips.
LOSMANDY

VIXEN

ARCA

Installation and Use

Structure Switching

The installation method of EM31 Pro pier extension and tripod in altazimuth mode is the same as that of German equatorial mount. It is necessary to adjust the altitude angle to 90 degree, and the adjustment method is same as that of the German equatorial mount.

Installation and Use

Installation of telescope

💡

Confirm that the installation direction of the telescope is consistent with the direction marked on the bottom of the body

⚠️

Installation and Use

Horizontal calibration

The prerequisite for achieving accurate goto and stable tracking in altazimuth mode is that the azimuth rotation axis is perpendicular to the ground. EM31 Pro can confirm the status through the RA axis horizontal bubble
Installation and Use

Horizontal calibration

When using the AD120 horizontal adjuster, the horizontal state can be adjusted by adjusting the horizontal adjusters

⚠ All equipment need to be installed before starting to adjust the horizontal state
Installation and Use

Horizontal calibration

Obtain accurate horizontal state

💡 Power on the equatorial mount and manually rotate the RA axis to make the horizontal bubble parallel to the blue horizontal adjuster line shown in the diagram

💡 Adjust the two horizontal adjusters inside the blue circles until the horizontal bubble is centered
Installation and Use

Horizontal calibration

Obtain accurate horizontal state

💡 Power on the equatorial mount and manually rotate the RA axis so that the horizontal bubble is parallel to the red dashed line in the diagram

💡

Adjust the horizontal adjuster inside the red circle until the horizontal bubble is centered, and then the horizontal adjustment is completed
Installation and Use

Structure Switching

EM31 Pro can switch to altazimuth mount top mode by installing a supporting bracket on top

Installation and Use

top mode supporting bracket structure

1.Bracket Body

2.Rod locking knob

3.Side support rod

4.Rod support seat

5.Mounted rod

6.Rod sleeve

7.Rod sleeve locking handle

Installation and Use

Structure Switching

The supporting bracket interface is suitable for installation with most dovetails

⚠️

Note the installation direction of the dovetail slot knob, as illustrated

⚠️ The top mode supporting bracket does not come with a dovetail, you can use the dovetail on the body or choose your own.

Installation and Use

Structure Switching

💡 Replace the dovetail on the equatorial mount body with an supporting bracket connecting adapter and adjust the altitude angle to 0 degrees

Installation and Use

Structure Switching

Invert the body of the Equatorial mount and install it with the pier extension and tripod in the same way as in the German Equatorial mount mode
Installation and Use

Structure Switching

💡 Insert the supporting bracket into the equatorial mount body base and rotate the knob clockwise until it locks, and rotate the Rob support seat(4) clockwise until it reaches the bottom but do not lock it tightly
(4)

Installation and Use

Structure Switching

💡 Adjust the altitude fine adjustment knob so that the lower edge of the upper mounting bracket is parallel to the edge of the bottom shell of the equatorial mount body

altitude fine adjustment knob

parallel

💡 Adjust the azimuth knob so that the side edge of the upper bracket is parallel to the edge of the bottom cover of the mount body

Azimuth knob
parallel
⚠️ Boundary parallelism can be judged by adjusting the perspective observation

# Installation and Use

Structure Switching

Clockwise into the Side support rod

Installation and Use

 Structure Switching

Turn the Mounted rod(5) into the Side support rod(3), and rotate the Rod sleeve locking handle(7) clockwise to lock it. After locking, hold the Mounted rod(5) tightly and rotate it clockwise to lock the Side support rod(3) again
Secondary locking

(7)

(5)

(3)

Installation and Use

Structure Switching

💡

Loosen the Rod sleeve locking handle(7) counterclockwise and press the Mounted rod(5), while aligning the Mounted rod(5) with the Rod support seat(4) and releasing the Mounted rod(5)

(7)

(4)   (5)
Installation and Use

Structure Switching

Rotate the Rod sleeve locking handle(7) and Rod locking knob(2) clockwise

Rotate Rod support seat(4) counterclockwise half a turn to one turn to fully lock the Mounted rod(5) and complete the installation of the top mode supporting bracket

(2)

(7)

(5)

(4)

Installation and Use

Telescope installation

Install the telescope into the upper dovetail, ensuring that the installation direction of the telescope is consistent with the direction marked on the top mode supporting bracket
Installation and Use

Level adjustment

The top mode is Altazimuth mode, it is necessary to adjust the horizontal state. Accurate horizontal state can be obtained through horizontal bubbles on the DEC axis

DEC axis level bubble

🔆 Complete the horizontal adjustment by adjusting the horizontal adjuster installed on the tripod, using the same method in the same way as the Altazimuth side mounted mode
Installation and Use

Cable connection

Cable connection

EM31 Pro has two sets of cable connections, one on the bottom of the body, the other on the DEC rotation axis, both are identical in function

USB 2.0
Type A

H.C
YC8 6

DC 12V
5.5-2.1

⊘ Prohibit simultaneous connection of two power sources
Prohibit simultaneous access to two controllers
Prohibit simultaneous access to two astronomical controller
(any PC, astronomical box, mini PC)

Installation and Use

Power connection method
There are two DC 12v connector in the body of EM31 Pro
Any connector can be used as a power input, and the other
connector can be used as a power output to supply power
to other astronomical devices.

💡 For astrophotography, it is recommended to use the
bottom connector of the body as the power input and the
DEC axis connector as the output connector

DC 12V
output

DC 12V input
⊘ Prohibit simultaneous access to two power supplies, the
output connector device load shall not exceed 12v 5A

⚠ When only the equatorial mount is used, it is recommended
to use DC 12V 2A or more power supply. When other
equipment is used, it is recommended to use DC 12V 5A or
more power supply. The power output interface can provide
5A stable current.

Installation and Use

USB cable connection method

EM31 Pro has two USB interfaces, each of which can be connected to the equatorial mount and the host computer (PC, astronomical box, mini PC).

💡 For astrophotography, it is recommended to use the DEC axis interface to connect the astronomical box or PC. At this point, the USB and power output cables can rotate synchronously with the telescope, effectively preventing cable entanglement

Connection of astronomical box or PC when deep space photography

Prohibit connecting devices other than PCs, Astro Boxes, and Astro Industrial Controls.
Prohibit connecting the equatorial mount through any USB hub
Installation and Use

Handle connection

EM31 Pro has two USB interfaces, each of which can be connected to the equatorial mount and the host computer (PC, astronomical box, mini PC).

Handle connected to body bottom in the modes of German equatorial m... and Altazimuth moun...

Handle connected to DEC axis cable management in Altazimuth top mode

⊘ **Prohibit connecting two handle controllers simultaneously Prohibit the plugging and unplugging of the handle controller in the charged state of the equatorial mount**

# Installation and Use

Mode selection

EM31 Pro mode selection indicated by the "Type" light，
Blue is Altazimuth Mount side mode，**Red is Altazimuth Mount top mode,** Light out for German equatorial mount

|		
Wait for 5 seconds when the Equatorial mount is powered on, and enter mode switching after the Status light flashes off	By clicking the Switch button, the Type light will begin to change, blue-red-off, and the Type light will be switched once per key press, which can be switched cyclically.	After confirming the required mode, wait for 10 seconds, the Status light will remain on after flashing, and the mode switch is complete
⚠ When the mount is in operation, the Status light will be on constantly and will start flashing when tracking is turned on

Accessory Installation

The electronic polar scope can be connected to EM31Pro via an adapter mount.

Adapter mount for Ipolar(the latest version)
Adapter mount for QHY Pole Master

Accessory Installation

Ball head mount

EM31 Pro can install a DSLR gimbal through the Ball head mount

3/8 16 bolts

Battery Installation

Battery replacement

Battery model CR1220

🚫 **Do not replace batteries while powered on**

Onstep Quick Start Guide

Onstep guide

Users can set and control the Equatorial mount through Android Onstep APP or webpage

IOS system cannot use APP, webpage is workable

Search for WIFI hotspot Onstep connection through PC or mobile phone, password: password

Enter "192.168.0.1:9999" or "192.168.0.1" into the browser

Onstep Quick Start Guide

💡 When using the Equatorial mount for the first time or changing the address, you need to set the longitude and latitude coordinates and local time of the Equatorial mount (can be synchronized through NINA or the Asiair)

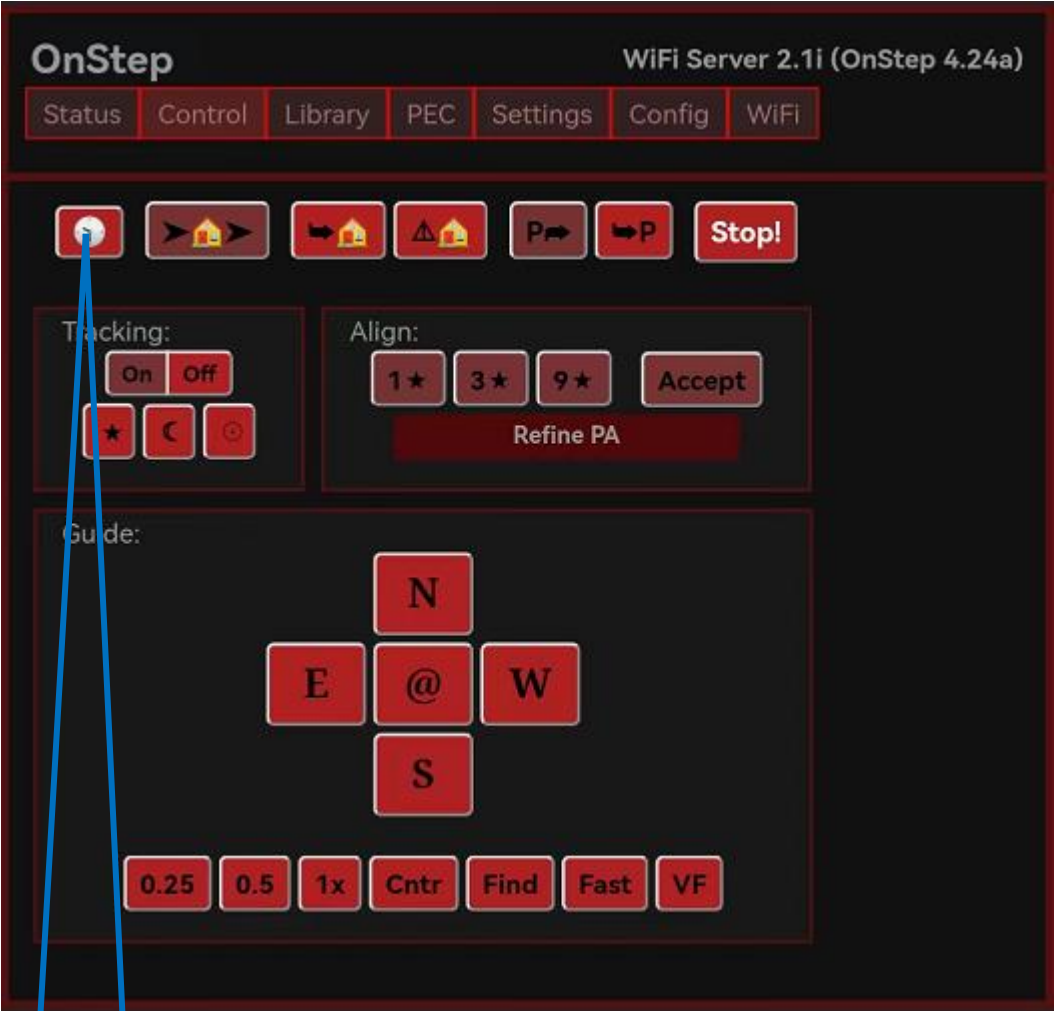

Set the equation of time

Latitude and longitude coordinates

Start Tracking
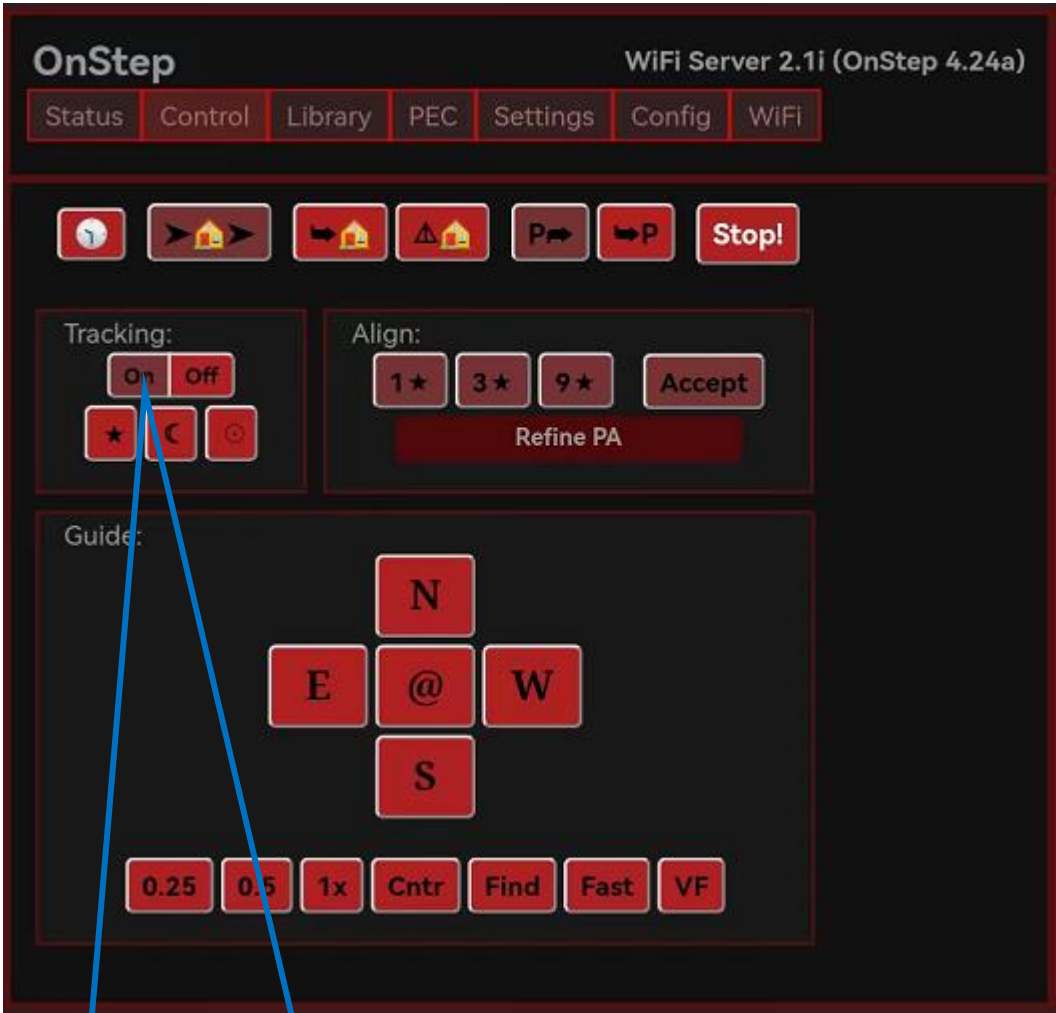

Turn on Tracking, and the rotation of the equatorial mount can be controlled by operating the direction keys.

⚠️ **Onstep system option, gray indicates ON status**

Onstep Quick Start Guide

⚠ **The physical zero position is different in the three modes of EM31 pro, so it needs to be set before using the equipment**

After the tracking is enabled, manually control the Equatorial mount to rotate to the zero position, and click the "at home" key to remember the zero position of the mount.
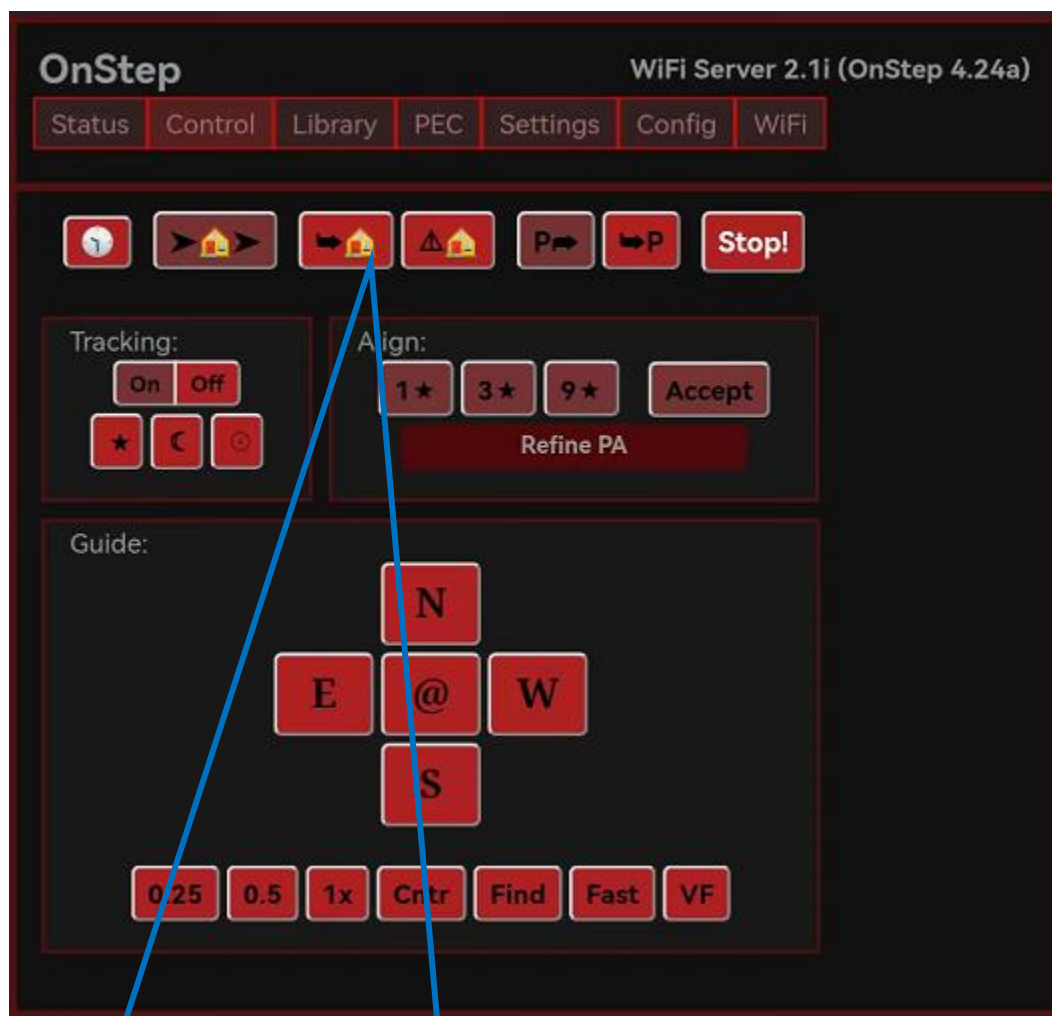

⚠

Note: After setting the zero position, the Equatorial mount returns to Untracking status, and you need to click Tracking On again to start tracking

Onstep Quick Start Guide

Onstep guide

The physical zero position is different in the three modes of EM31 pro, so it needs to be set before using the equipment

Click the "go home" button to make the mount return to the set zero position.

⚠ **Note:, After powering off and powering on the mount again, the power-on-position will be zero by default. So it is necessary to reset the correct zero position. Alternatively, it is recommended to click the "go home" button to return the mount to the set zero position after each shooting is completed in order to avoid setting it again in the next use**

Onstep Quick Start Guide

Limit position setting
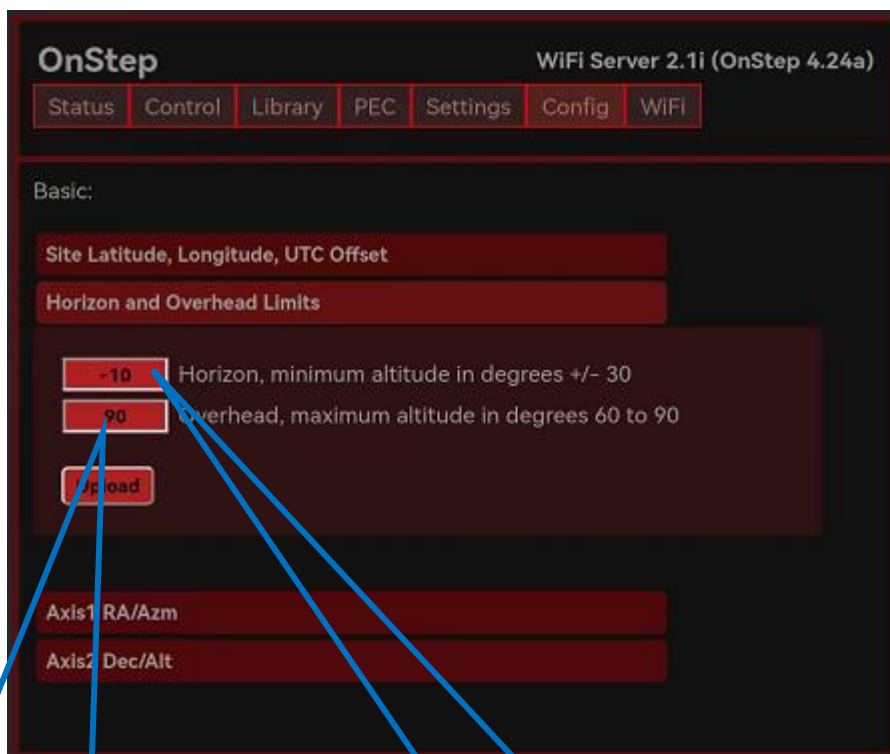

German Equatorial mount mode, DEC axis rotation limit

altitude angle limit in Altazimuth mode

⚠

Note : When the manual operation of the mount rotation exceeds the set limit, the mount will stop rotating, press the key again, the mount will only move a small angle.
Once the Goto target exceeds the limit, Goto will stop.
The limit position is related to the time, latitude and longitude coordinates and zero position setting of the mount.

Firmware Update

Firmware update

Tick

Enter 0x00

Click START to start uploading after the interface is set up

Select serial port
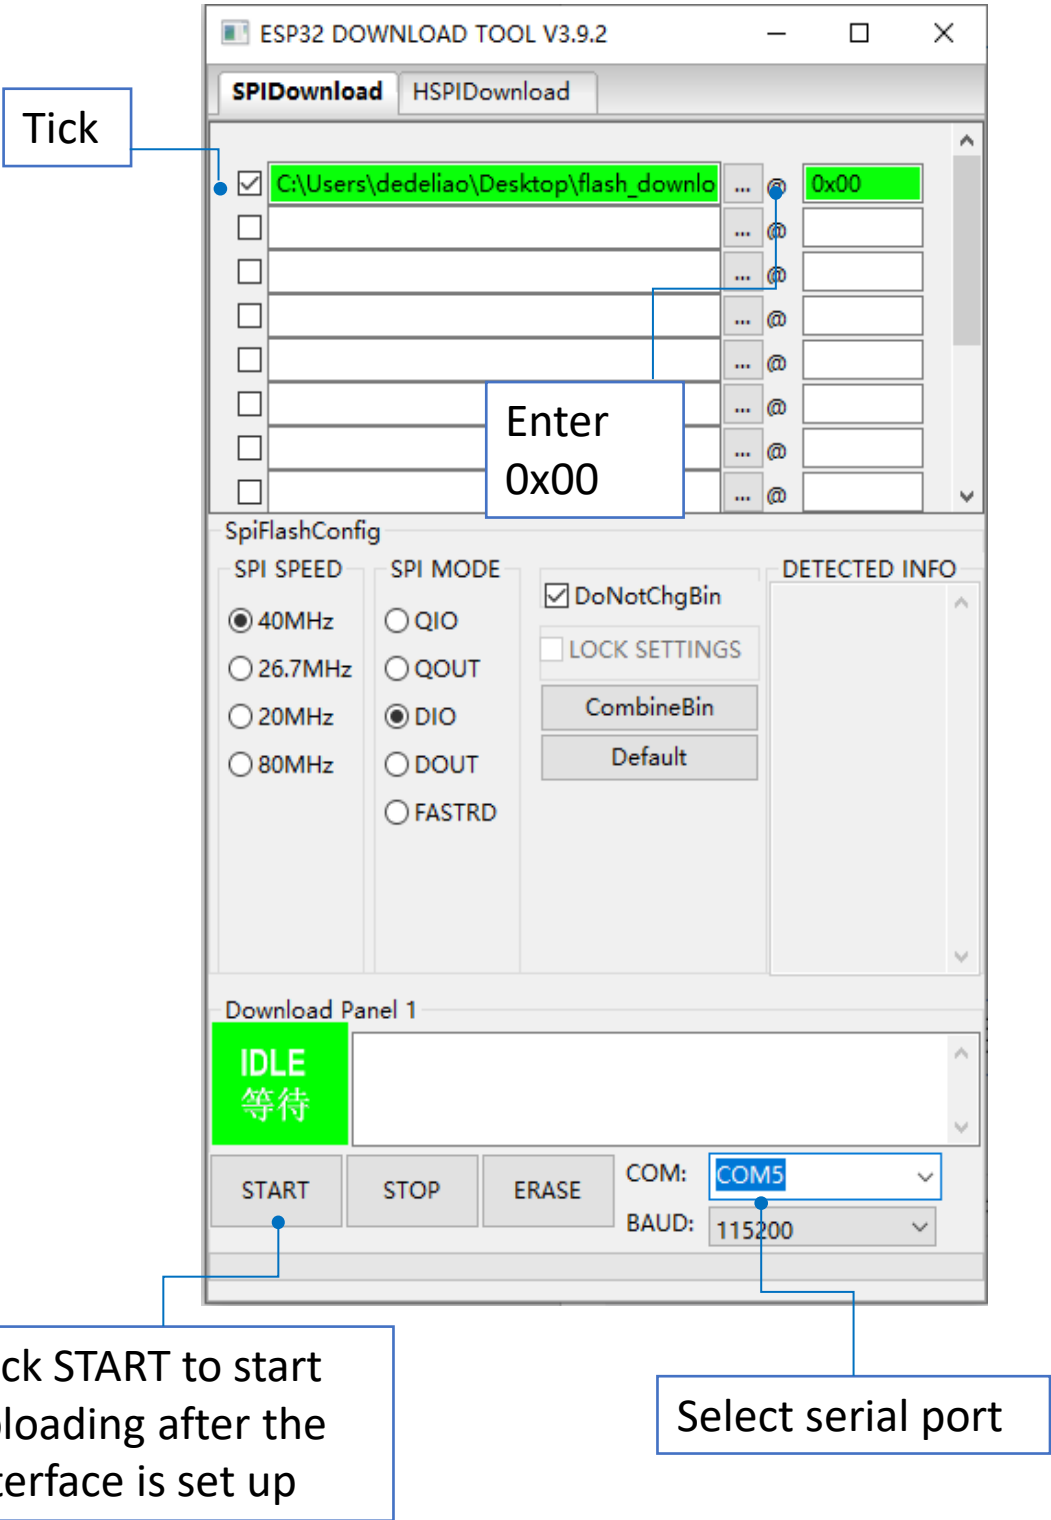

Firmware Update

Start the upload process

The upload program is complete, and the status bar on the left shows "is stub and send flash finish"

After the firmware update is completed, disconnect all power connections (including the 12V power supply and USB cable) to disconnect the equatorial mount, and then turn on the power after 6s, the equatorial mount will enter into normal working status.

Warranty Statement

Warranty

Thank you for purchasing the EM31Pro Harmonic Equatorial Mount. To ensure you have the best experience with our product, we provide a two-year warranty service for the EM31Pro Harmonic Equatorial Mount. Below are the specific warranty terms and conditions:

Warranty Period
This product is covered by a two-year warranty starting from the date of purchase.

Warranty Coverage
During the warranty period, if the product exhibits any material or workmanship defects under normal use, we will provide free repair or replacement services. This includes, but is not limited to:
- Motor failure
- Control board failure
- Mechanical structure damage

Warranty Exclusions
The warranty does not cover the following situations:
1. **Human-induced damage**: Including but not limited to damage caused by dropping, impact, submersion, excessive use, etc.
2. **Unauthorized repair or modification**: If the product has been repaired or modified by an unauthorized service provider, the warranty will be void.
3. **Accidents or natural disasters**: Including but not limited to fire, earthquake, flood, lightning, etc.

Warranty Statement

Warranty

4. Normal wear and tear: Such as normal wear and tear, scratches on the exterior, etc.

Warranty Service Procedure

1.Contact Customer Service: If your product requires repair, please first contact the after-sales service of the purchase channel or directly contact our customer service center. Provide a detailed description of the fault.

2.Fault Diagnosis: We will conduct a preliminary diagnosis of the reported fault via email. If further inspection is needed, we will guide you to send the product to the designated repair center.

3.Repair or Replacement: Once the product is confirmed to be within the warranty conditions, we will provide free repair services. If the product cannot be repaired, we will replace it with the same model or an equivalent product of the same value.

4.Return Shipping: The repaired or replaced product will be shipped back to you via courier.

Important Notes

- Before sending the product, please ensure it is properly packaged to avoid further damage during transit.
- When shipping, include a description of the fault.

If you have any questions or need further assistance, please feel free to contact our customer service team. We are dedicated to serving you.
