

EM31PRO STRAIN WAVE MOUNT USER MANUAL V2.3

EMCAN

www.emcanastro.com

Reading Tips

Reading Interpretation

Thank you for choosing EM31Pro Strain Wave Mount.

The manual is based on the factory default specifications. Therefore, some specifications or appearance of your mount may be different. This manual is subject to change without prior notice.

The manual can still be used as a guide when there are differences in appearance or structure but no substantial differences in function or the use methods.

In order to ensure proper use of the mount, please read this user manual carefully before starting to use

Symbol Description

forbidden

Important points

Operation instruction

**Blue stands for
counterclockwise
rotation**

**Green stands for
clockwise
rotation**

Observe in the direction indicated by the dashed arrow.

Reading Tips

Security precautions

-  Please install and use the mount in strict accordance with the steps and precautions reminded in this manual, operators shall be responsible for any damage to the equipment or personal injury caused by improper operation.
-  Ensure the mount's time, coordinates, and home position are properly set before use. Incorrect settings can cause GOTO errors or equipment collisions.
-  After installation, carefully check for any interference. Collisions can damage components, causing malfunctions or accuracy issues. Unplug immediately if interference or emergencies occur.
-  Please be careful when you carry, assemble or disassemble the mount and other heavy components and other equipments used on the mount . Or it may cause damage to the equipments or even personal injury.
-  Please ensure the entire setup is placed on a stable, flat surface and confirm the tripod has enough capacity and support area to prevent tipping, which could cause equipment damage or personal injury.
-  If there are children around when using, please pay attention to protecting their safety
-  The operating temperature of this mount ranges from -15°C to 40°C. Please use the mount reasonably under proper environmental conditions
-  Do not wipe the surface with corrosive liquid. Avoid water immersion and exposure to rain.
-  Unauthorized disassembly is strictly prohibited. Any self-disassembly will result in the warranty being voided.

Product Overview

Brief Introduction

The EM31Pro Stain Wave Mount uses **17+17 strain wave reducers**. It is a **lightweight** mount but with a **high payload** capacity and **high-precision**. The EM31Pro supports **three modes**: EQ mode, Alt/Az side mode and Alt/Az top mode.

Mode	Astrophotography	Visual - telescope	Visual- Binoculars
EQ Mode	All objects	Yes	---
Alt/Az Side	Planets,Sun,Moon	Yes	---
Alt/Az Top	Planets,Sun,Moon	Yes	Yes

The different modes cater to the needs of both astrophotographers and visual observers.

Its **compact and lightweight design** makes transportation to your photography or viewing location effortless.

The **innovative altitude adjustment mechanism** provides an exceptionally **smooth experience for polar alignment**

The **quick-installation system** simplifies setup, allowing you to begin observing or capturing images faster.

Thoughtful **cable management** ensures tidy wiring and prevents tangling.

The **ergonomic design** enhances user comfort.

Crafted with **precision and premium materials**, the mount combines durability and elegance.

At EMCAN, we are dedicated to delivering a seamless experience, exceeding the expectations of astronomy enthusiasts.

Product Overview

Specification

1. **Weight of the main body:** approx. 4kg (without Dovetail & adapter)
 2. **Payload:** ≤15kg (without counterweight)
≤20kg (with counterweight)
- Note:** payload calculated in the condition that the telescope's center of gravity is 20cm from RA axis
3. **Latitude adjustment:** 0°~90° (fine adjustment +/-10°)
 4. **Azimuth adjustment:** -8°~+8°
 5. **RA:** 17 type 100:1 SWG+ Synchronous Belt
(300:1 reduction ratio)
 6. **DEC:** 17 type 100:1 SWG+ Synchronous Belt
(300:1 reduction ratio)
 7. **Motor:** 42 Closed-loop stepper motor (RA with Brake)
 8. **Goto speed:** max 6°/s
 9. **Power port:** DC5.5-2.1 12V 5A (Cable Management Support)
 10. **Power consumption:** tracking 0.4A, Goto 0.7A
 11. **Communication interface:** usb2.0, Wi-Fi, Bluetooth
 12. **Support:** Asiair、 ASCOM (NINA、 PHD2)、 INDI、 SkySafari
 13. **Dovetail:** Vixen 75° & LOSMANDY 60°; Arca(Optional)
 14. **Home position:** by bubble levels
 15. **Mode:** Equatorial mode; Altazimuth mode (side & top)
 16. **Hand controller:** Wired hand controller

 The payload capacity is not exactly equal to the total weight of the equipment being mounted. The effective weight that the mount can support depends closely on the center of gravity of the entire setup. Equipment with a higher center of gravity will reduce the mount's load-bearing capacity accordingly.

Before installing heavy equipment with a high center of gravity, please refer to the EM31Pro load formula to ensure it does not exceed the weight limit.

Product Overview

Standard Packing

1	EM31 Pro Body	X1
2	Hand Controller	X1
3	Dovetail (VIXEN & LOSMANDY)	X1
4	Adapter	X1
5	0.5m USB2.0 Cable	X1
6	2m USB2.0 Cable	X1
7	Shockproof Soft Bag	X1

Product Overview

Components

1. Dovetail
2. DEC 12v DC 5.5*2.1
3. DEC Hand controller port
4. DEC USB port (type A)
5. Main altitude locking knob
6. Azimuth adjustment knob
7. Altitude fine adjustment knob
8. Auxiliary altitude locking knob
9. Bubble level for DEC axis
10. Bubble level for RA axis
11. Multifunctional front support
12. Counterweight bar interface
13. Mode indicator light
14. Mode switching button
15. Battery cover plate
16. USB port (type A)
17. Ball head interface
18. 12v DC 5.5*2.1 power port
19. Hand controller port
20. Telescope directional mark

Product Overview

Interface Size

The standard dovetail of EM31Pro can be replaced, and the installation dimensions of the dovetail are as follows:

EM31Pro supports counterweight bar with a diameter less than 20mm, and with length less than 300mm, the counterweight should be no more than 5kg

The screw thread length of the counterweight bar shall not exceed 12mm

Product Overview

Optional Accessories:

EM TC44S Tripod

RP200 Extension Rod

AD120 Horizontal Adjuster

TC44A
(TC44S+AD120)

TC44L
(TC44S+RP200)

TC44U
(TC44S+AD120+RP200)

Parameters:

Tripod interface: 85mm	Locking method: 3/8+three screws locked
Carbon fiber tube diameter: 44mm	Carbon fiber tube thickness: 2mm
Storage length:	EM-TC44S 620mm
	EM-TC44A 720mm
	EM-TC44L 850mm
	EM-TC44U 950mm

Size:

Unfolded height:	EM-TC44S 530mm
	EM-TC44A 620mm
	EM-TC44L 720mm
	EM-TC44U 810mm
Weight:	EM-TC44S approx. 2.5kg
	EM-TC44A approx. 3.4kg
	EM-TC44L approx. 3.3kg
	EM-TC44U approx. 4.2kg

This accessory needs to be purchased separately

Product Overview

Optional Accessories:

EMH150 Fast-assembling pier extension

**Material: Aluminum(AL6061),
Stainless steel**

Size: H150mm dia110mm

Weight: 1.2kg

 This accessory needs to be purchased separately

Product Overview

Optional Accessories:

EMH200 Fast-assembling pier extension

**Material: Aluminum(AL6061),
Stainless steel**
Size: H200mm dia110mm
Weight: 1.4kg

 This accessory needs to be purchased separately

Product Overview

Optional Accessories :

Top-mounted mode supporting bracket

Material:

**Aluminum(AL6061),Stainless steel,
Titanium alloy(counterweight bar)**

Size: L350mm

Weight: 1.8kg

Suitable for Binoculars

This accessory needs to be purchased separately

Product Overview

Optional Accessories :

Ball head mount
adapter

Arca board strips

This accessory needs to be purchased separately

Product Overview

Optional Accessories :

Adapter for QHY
Pole master

Adaptor for iPolar
(Only applicable to
specific version)

This accessory needs to be purchased separately

Standard Use Procedure

Use Procedure

EQ Mode

Install equipment

※ Set time and coordinates

※※ Set home position

Polar alignment

Select target and Goto

Using Target Calibration

Come into use

⚠ Ensure the site coordinates, time, and home position are set correctly to avoid GOTO errors or equipment collisions.

⚠ **For OnStep, South latitude & East longitude (-); North latitude & West longitude (+); UTC: East of the prime meridian (-), West (+),**

⚠ EM31Pro retains coordinates and time; no reset is needed if unchanged.

The mount remembers its last power-off position as the “home position”. Be sure to either return the mount to the correct home position before shutting it down, or manually reset the home position after each power-on.

Standard Use Procedure

Use Procedure

Home position of EQ mode

The EQ mode home position is shown in the diagram below. This is the position the mount should be in before power-off, or should be reset manually after each power-on.

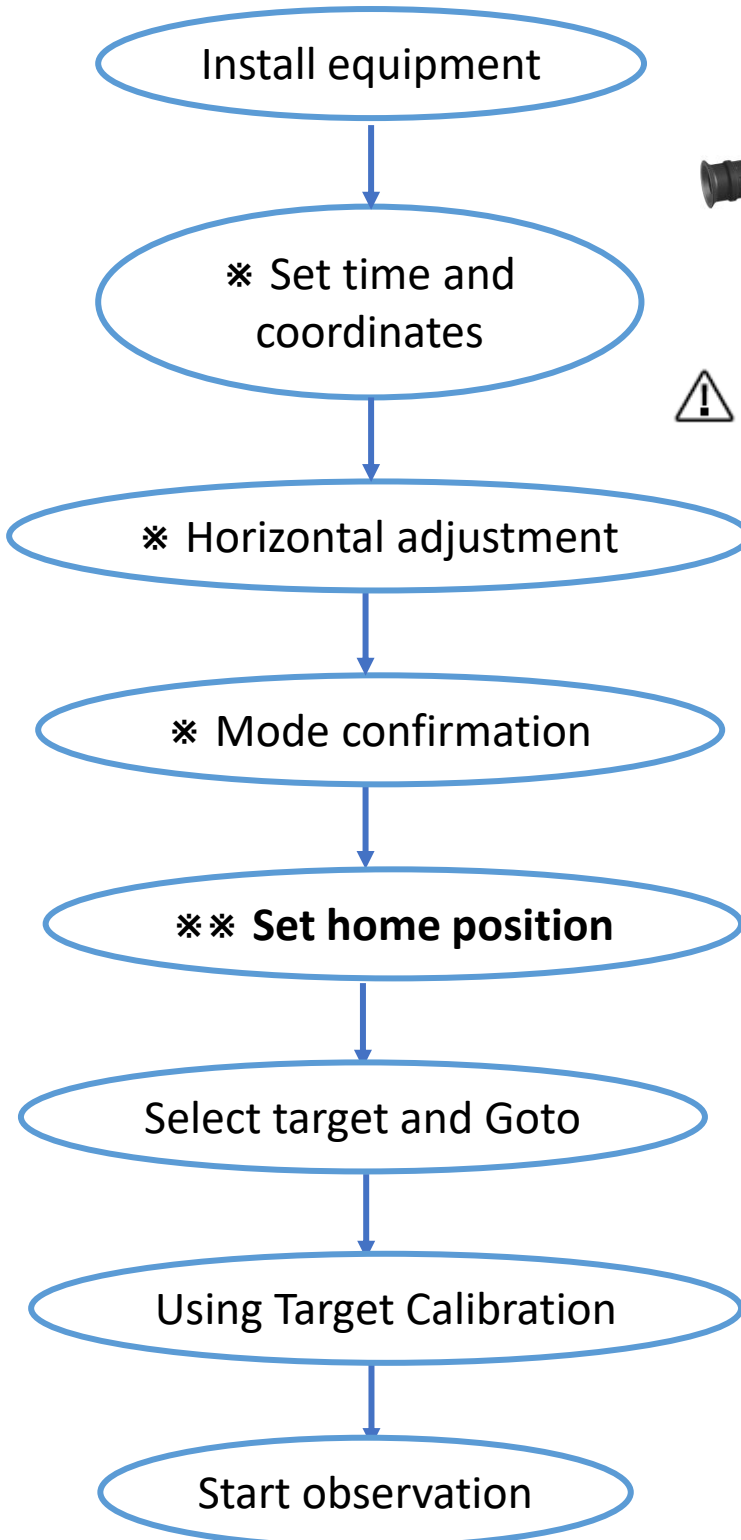

EM31Pro can confirm the EQ mode home position using the bubble levels on the RA and DEC axes.

Standard Use Procedure

Use Procedure

Altazimuth Mode (side & top)

Ensure the site coordinates, time, and home position are set correctly to avoid GOTO errors or equipment collisions.

For OnStep, South latitude & East longitude (-); North latitude & West longitude (+); UTC: East of the prime meridian (-), West (+),

EM31Pro retains coordinates and time; no reset is needed if unchanged.

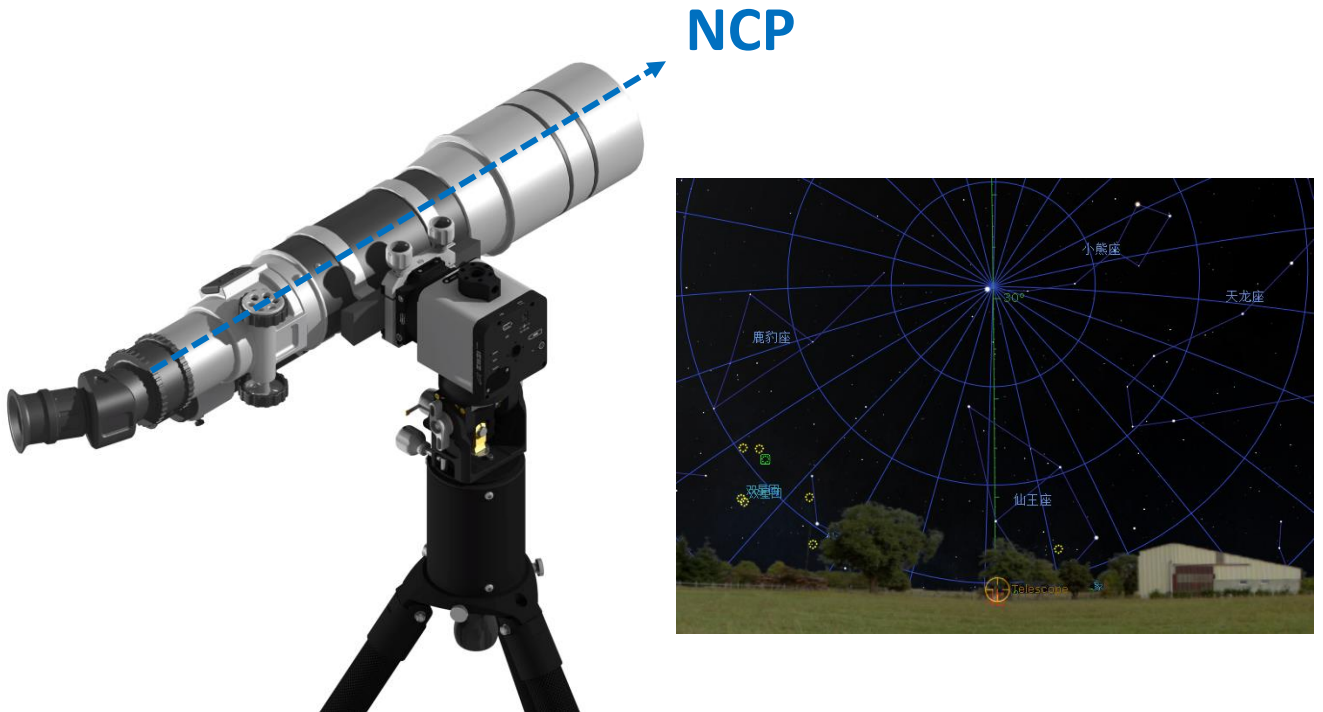

The mount remembers its last power-off position as the “home position”. Be sure to either return the mount to the correct home position before shutting it down, or manually reset the home position after each power-on.

Standard Use Procedure

Use Procedure

Home position of Altazimuth Mode (Side & Top)

The home position of the Altazimuth mode is shown in the diagram below, and the telescope points to the NCP.

The home position can be confirmed through a mobile compass and bubble levels

Installation and Use

Installation of the mount with pier extension and tripod

EM 31 Pro can be mounted on center-column-free tripods with a bore diameter of 85 mm, such as RT90C, Gitzo5

⚠ Size and style of the 3/8-16 locking screw should be proper.

Ensure that non-official tripods are compatible with the mount and securely attached, with no wobbling or movement, to avoid precision issues or potential equipment falls.

Installation and Use

Installation of the mount with pier extension and tripod

The standard setup does not include accessories for mounting the EM31Pro on non-compatible tripods. Users who wish to install the mount on a different tripod will need to design and fabricate a custom adapter and appropriate mounting bolts.

The dimensions should follow the chart below :

Correct adapter structure

Incorrect adapter structure, it is prohibited to connect to the mount through only one plane

Installation and Use

Installation the mount with pier extension and tripod

When using the EMTC44 tripod, the mount body can be directly attached to the tripod via the officially supplied adapter and secured with the tripod's three knobs for a more reliable connection.

Installation and Use

Installation of the mount with pier extension and tripod

The EMTC44S is a high-load tripod specifically designed for astronomical applications. Its rigidity is enhanced by a non-retractable structure crafted from 44mm/2mm carbon fiber tubes. Additionally, the tripod's height and support area can be extended using the heightening section.

Rotate clockwise to install the extension rod and horizontal adjuster

Installation and Use

Installation of the mount with pier extension and tripod

The strain wave mount is compact, and when using a longer telescope, there is a risk of collision between the telescope and the tripod, especially near the zenith or the meridian. In this case, a pier extension is needed to avoid collisions.

Installation and Use

Installation of the mount with pier extension and tripod

Installation steps with the pier extension

Installation and Use

Installation of the mount with pier extension and tripod

Installation steps with the pier extension

Main locking knob

Gently Push up the main tripod locking knob and rotate it clockwise until the knob and pier extension cannot rotate relative to each other

Note that if this step is not performed correctly, the mount body and pier extension may not be separated properly when disassembling the equipment.

Installation and Use

Installation of the mount with pier extension and tripod

Installation steps with the pier extension

Place the mount body with the adapter into the pier extension

Installation and Use

Installation of the mount with pier extension and tripod

Installation steps with the pier extension

💡 Push upward and continue rotating the main tripod locking knob clockwise until it is tightly secured.

Next, rotate the three auxiliary tripod locking knobs clockwise until they are firmly locked.

At this point, the installation of the mount body, pier extension, and tripod is complete

💡 To lock the mount body, first push the main locking knob upward with slight force, then rotate the knob clockwise to secure it.

Installation and Use

Adjustment of altitude and azimuth angles of the equatorial mode

Altitude coarse adjustment

Step1. Rotate counterclockwise to release the auxiliary altitude locking knob

Rotate one to one and a half turns until it loosens, avoid over-rotation

Step2. Rotate the main altitude locking knob counterclockwise until the two pairs of flat gears are completely separated. At this point, the altitude angles can be freely adjusted

When the main altitude locking knob is loosened, the mount loses its support. During the coarse adjustment process, ensure that the mount is always supported by hand until the main altitude locking knob is securely tightened again.

Installation and Use

Adjustment of altitude and azimuth angles of the equatorial mode

Altitude coarse adjustment

💡 Refer to the altitude scale and adjust the altitude angle to approximately match the local latitude. (For example, if the local latitude is $31^{\circ}13'20''$, set and lock the altitude near 30°)

When the main altitude locking knob is loosened, the mount loses its support. During the coarse adjustment process, ensure that the mount is always supported by hand until the main altitude locking knob is securely tightened again.

Roughly adjust the altitude angle at 10° intervals, such as 0° , 10° , 20° , 30° ... 90°

Installation and Use

Adjustment of altitude and azimuth angles of the equatorial mode

Altitude coarse adjustment

- 💡 Rotate the main altitude locking knob clockwise at the approximate latitude position until the flat gear engages. Then, rotate the auxiliary altitude locking knob clockwise to complete coarse adjustment of the altitude angle

Note that the flat gear must engage correctly, as shown in the left diagram. Incorrect engagement may cause the equipment to slip

When the main altitude locking knob is loosened, the mount loses its support. During the coarse adjustment process, ensure that the mount is always supported by hand until the main altitude locking knob is securely tightened again.

Altitude angle coarse adjustment completed

Installation and Use

Adjustment of altitude and azimuth angles of the equatorial mode

Precise alignment of polar axis

1. For astrophotography, polar calibration can be completed through plate solving
2. EM31 Pro supports the installation of Pole master or iPolar to complete polar calibration

Adapter for
electronic
polar
alignment
scope

Once all equipment is installed, precise polar alignment can be achieved by rotating the azimuth adjustment knobs and altitude fine adjustment knob

Accessory Installation

Installation of dovetail

Dovetail

The interface on the EM31Pro DEC top plate is compatible with most dovetails, allowing users to replace the dovetail as needed.

Accessory Installation

Installation of dovetail

Dovetail

The EM31Pro comes with standard LOSMANDY 60° and Vixen 75° dovetail compatibility. Arca specifications can be achieved by installing the dovetail Acra strips (optional)

LOSMANDY

VIXEN

ARCA(optional)

Installation and Use

Altazimuth Mode

Structure Switching

The installation method for the EM31Pro pier extension and tripod in altazimuth mode is identical to that in equatorial mode. Adjust the altitude angle to 90 degrees using the same procedure as in equatorial mode.

Installation and Use

Altazimuth mode

Installation of telescope

Confirm that the installation direction of the telescope is consistent with the direction marked on the bottom of the body. **Installing the telescope in reverse can result in GOTO errors and may even lead to collisions that could damage the equipment.**

Installation and Use

Altazimuth Mode

Horizontal calibration

Accurate GOTO and stable tracking in altazimuth mode require the azimuth rotation axis to be perpendicular to the ground. The EM31Pro allows users to confirm this alignment using the horizontal bubble on the RA axis.

Installation and Use

Altazimuth Mode

Horizontal calibration

When using the AD120 horizontal adjuster, the level state can be achieved by adjusting the horizontal adjusters

 All equipment need to be installed before starting to adjust the level state

Installation and Use

Altazimuth Mode

Horizontal calibration

Obtain accurate horizontal state

💡 Power on the mount and manually rotate the RA axis until the horizontal bubble is parallel to the blue horizontal adjuster line shown in the diagram.

💡 Adjust the two horizontal adjusters inside the blue circles until the horizontal bubble is centered

Installation and Use

Altazimuth Mode

Horizontal calibration

Obtain accurate horizontal state

- 💡 Manually rotate the RA axis until the horizontal bubble aligns with the red dashed line in the diagram.

- 💡 Adjust the horizontal adjuster inside the red circle until the horizontal bubble is centered, indicating that the horizontal adjustment is complete.

Installation and Use

Altazimuth Mode-Top mounting

Structure Switching

EM31 Pro can achieve the altazimuth top mode by installing a supporting bracket on top

Installation and Use

Altazimuth Mode-Top mounting

Top mode supporting bracket structure

Installation and Use

Altazimuth Mode-Top mounting

Structure Switching

The supporting bracket interface is compatible with most dovetails.

Pay attention to the installation direction of the dovetail knobs, as shown in the diagram.

The top mode supporting bracket does not come with a dovetail, you can use the dovetail on the EM31Pro body or choose your own.

Installation and Use

Altazimuth Mode-Top mounting

Structure Switching

- 💡 Replace the dovetail on the mount body with a supporting bracket connecting adapter and adjust the altitude angle to 0 degrees

Installation and Use

Altazimuth Mode-Top mounting

Structure Switching

Invert the mount body and install it with the pier extension and tripod, following the same steps as in Equatorial mode.

Installation and Use

Altazimuth Mode-Top Mounting

Structure Switching

- 💡 Insert the supporting bracket into the mount body base and rotate the knob clockwise until it is locked. Then, rotate the Rob support seat(4) clockwise until it reaches the bottom but do not lock it tightly

Installation and Use

Altazimuth Mode-Top Mounting

Structure Switching

- Adjust the altitude fine adjustment knob until the lower edge of the top-mount bracket is parallel to the edge of the mount body's base.

- Adjust the azimuth knob until the side edge of the top-mount bracket is parallel to the edge of the mount body's base.

- ⚠ Parallel alignment of the edges can be determined by adjusting the viewing angle.

Installation and Use

Altazimuth Mode-Top mounting

Structure Switching

Clockwise into the Side support rod

Installation and Use

Altazimuth Mode-Top mounting

Structure Switching

Turn the Mounted rod(5) into the Side support rod(3), and rotate the Rod sleeve locking handle(7) clockwise to lock it. After locking, hold the Mounted rod(5) tightly and rotate it clockwise to lock the Side support rod(3) again

Installation and Use

Altazimuth Mode-Top mounting

Structure Switching

Loosen the Rod sleeve locking handle(7) counterclockwise and press the Mounted rod(5), while aligning the Mounted rod(5) with the Rod support seat(4) and releasing the Mounted rod(5)

Installation and Use

Altazimuth Mode-Top mounting

Structure Switching

Rotate the Rod sleeve locking handle(7) and Rod locking knob(2) clockwise

Rotate Rod support seat(4) counterclockwise half a turn to one turn to fully lock the Mounted rod(5) and complete the installation of the top mode supporting bracket

Installation and Use

Altazimuth Mode-Top mounting

Telescope installation

Install the telescope into the upper dovetail, ensuring that the installation direction of the telescope is consistent with the direction marked on the top mode supporting bracket, **Installing the telescope in reverse can result in GOTO errors and may even lead to collisions that could damage the equipment.**

Installation and Use

Altazimuth Mode-Top mounting

Level adjustment

The top mode is Altazimuth mode, it is necessary to adjust the horizontal state. Accurate horizontal state can be obtained through horizontal bubbles on the DEC axis

DEC axis level
bubble

Complete the horizontal adjustment by adjusting the horizontal adjuster installed on the tripod, using the same method as in the side-mounted Alt-Az mode.

Installation and Use

Cable Connection

EM31 Pro has two sets of cable ports, located on the base of the mount and on the DEC rotation axis, both with identical functions.

**Do not connect two power sources simultaneously.
Do not connect two hand controllers simultaneously.
Do not connect two astronomical control devices
simultaneously (such as any PC, astronomy box, or Mini PC).**

Installation and Use

Cable Connection

Power connection method

EM31Pro features two DC 12V ports. Either port can serve as a power input, while the other can be used as a power output to supply power to other astronomical devices.

💡 For astrophotography, it is recommended to use the port on the base of the mount as the power input and the DEC axis port as the output.

⊘ Do not connect two power sources simultaneously. The load on the output port must not exceed 12V 5A.

⚠ When powering only the mount, it is recommended to use a DC 12V 2A power supply or higher. When powering other devices as well, use a DC 12V 5A power supply or higher.

Installation and Use

Cable Connection

USB cable connection method

EM31 Pro has two USB ports, each capable of connecting the mount to a control device (such as a PC, astronomy box, Mini PC).

💡 For astrophotography, it is recommended to connect the astronomy box or PC to the DEC axis port . This allows the USB and power output cables to rotate in sync with the telescope, effectively preventing cable tangling.

Connection of an astronomy box or PC for astrophotography

-
- ⊘ Prohibit connecting devices other than PCs, Astro Boxes, and Mini PC...
Do not connect the mount through any USB hub.

Installation and Use

Cable Connection

Handle connection

EM31 Pro has two handle controller ports, each capable of connecting the handle controller

Handle connected to the bottom of the mount in EQ and Alt/Az side modes.

Handle connected to DEC axis cable management in Alt/Az top mode

-
- ⊘ **Prohibit connecting two handle controllers simultaneously**
Do not plug and unplug the handle controller while the mount is powered on

Installation and Use

Mode Selection

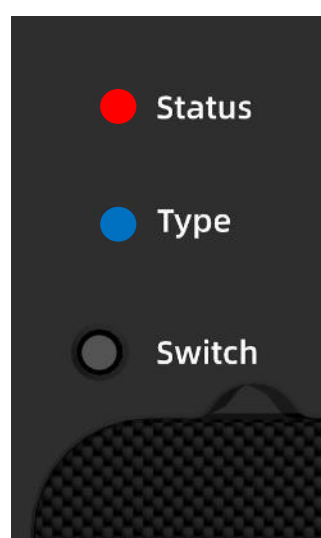

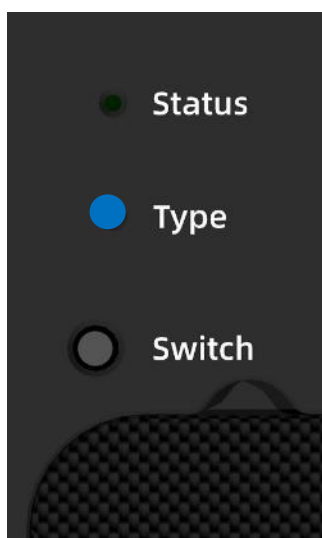

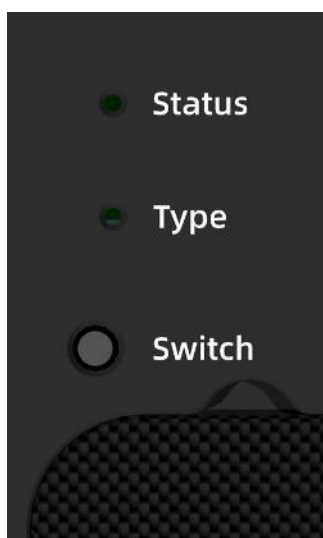

Mode selection

EM31 Pro mode selection indicated by the “Type” light , **Blue is Altazimuth side-mounted mode** , **Red is Altazimuth top-mounted mode**, **Light out for Equatorial mode**

Wait for 5 seconds when the mount is powered on, and enter mode switching after the Status light flashes off

By clicking the Switch button, the Type light will begin to change, blue-red-off, and the Type light will be switched once per key press, which can be switched cyclically.

After confirming the required mode, wait for 10 seconds, the Status light will remain on after flashing, and the mode switch is complete

 When the mount is in operation, the Status light will remain on and will start flashing once tracking is activated.

Accessory Installation

Adapter for electronic polar alignment scope

The electronic polar scope can be connected to EM31Pro via an adapter (optional accessory).

Adapter for iPolar
(the latest version)

Adapter for QHY Pole
Master

Accessory Installation

Ball head adapter

EM31 Pro can mount a DSLR through the ball head adapter (optional), allowing for wide-field astrophotography while capturing astronomical images.

3/8 16
bolts

Battery Installation

Install and replace the battery

Battery replacement

Battery model CR1220

💡 The battery stores the time and location coordinates. It is recommended to replace it every 12 to 18 months.

⊘ Do not replace the battery while powered on

OnStep Quick Start Guide

OnStep Guide

Android users can set and control the mount through OnStep APP or webpage

 **IOS system cannot use APP, webpage is workable**

 **Connect to the web via WiFi:**

Search for WIFI hotspot OnStep connection through PC or mobile phone, password: password

Enter "192.168.0.1:9999" or "192.168.0.1" into the browser

OnStep and PC connection

Step ① Installing the mount serial port driver cp2102

 **Confirm that the mount serial port connection is normal in Windows Device Manager**

Step ② Install ASCOM platform

<https://www.ascom-standards.org/>

Step ③ Install OnStep ASCOM driver

<https://emcanastro.com/downloads/>

OnStep Quick Start Guide

OnStep Guide

OnStep and PC connection

Select the correct serial port (check the correct port number in Device Manager) and connect the mount

The screenshot shows the 'OnStep Telescope Setup' window. At the top left is the ASCOM logo and version '3.7'. The 'OnStep' logo is in the center. On the right, 'Port:' is set to 'COM5' and 'IP Address:' is '192.168.0.1:9999'. Below this, 'Retry Timeout (3000ms):' has a slider. The status bar shows 'Currently connected to: OnStep 4.25a' and checkboxes for 'Enable Serial Port DTR Control' (checked) and 'Use Error Correction Protocol' (unchecked).

2. Via Wi-Fi (Android + Apple)

Connect to the mount's Wi-Fi hotspot.

Enter the following details:
IP: 192.168.0.1 Port: 9999 or 9998.

Firmware Update

Firmware Update

(Demonstrated using Windows 10)

① Connect the device to the PC

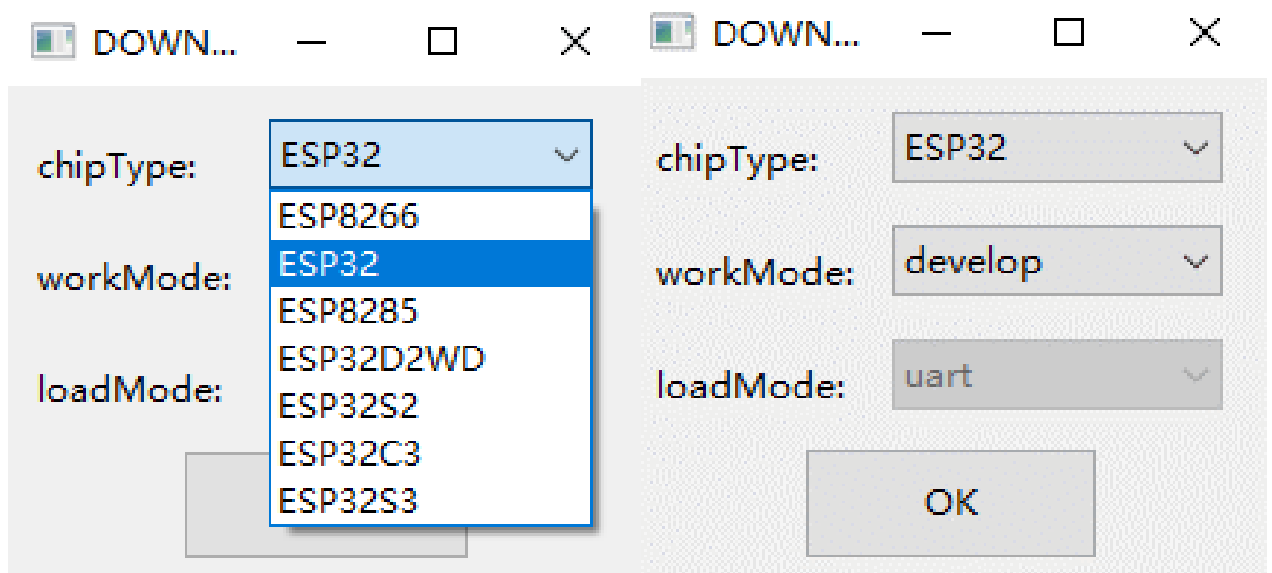

- If updating the Mount: Connect the mount to the PC via USB. If the PC's USB port provides insufficient power, please connect a 12V power supply to the mount.
- If updating the Hand controller: Simply connect the hand controller to the PC via USB. No need to connect the mount.

⚠ Note: The mount and hand controller use separate firmware files and do not require simultaneous updates.

② Open the firmware flashing software.

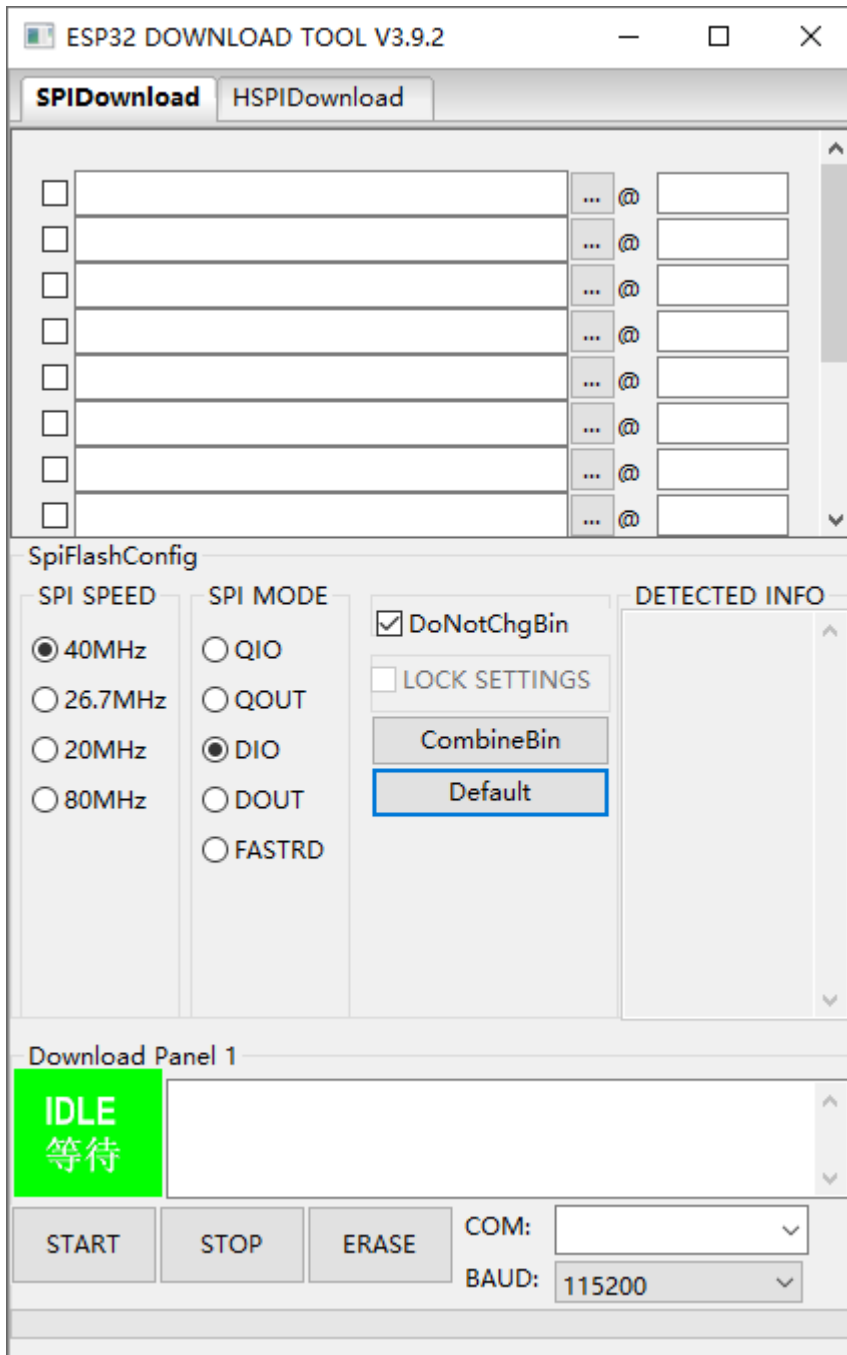

③ Select “ESP32” and “develop” and confirm

Firmware Update

Firmware Update

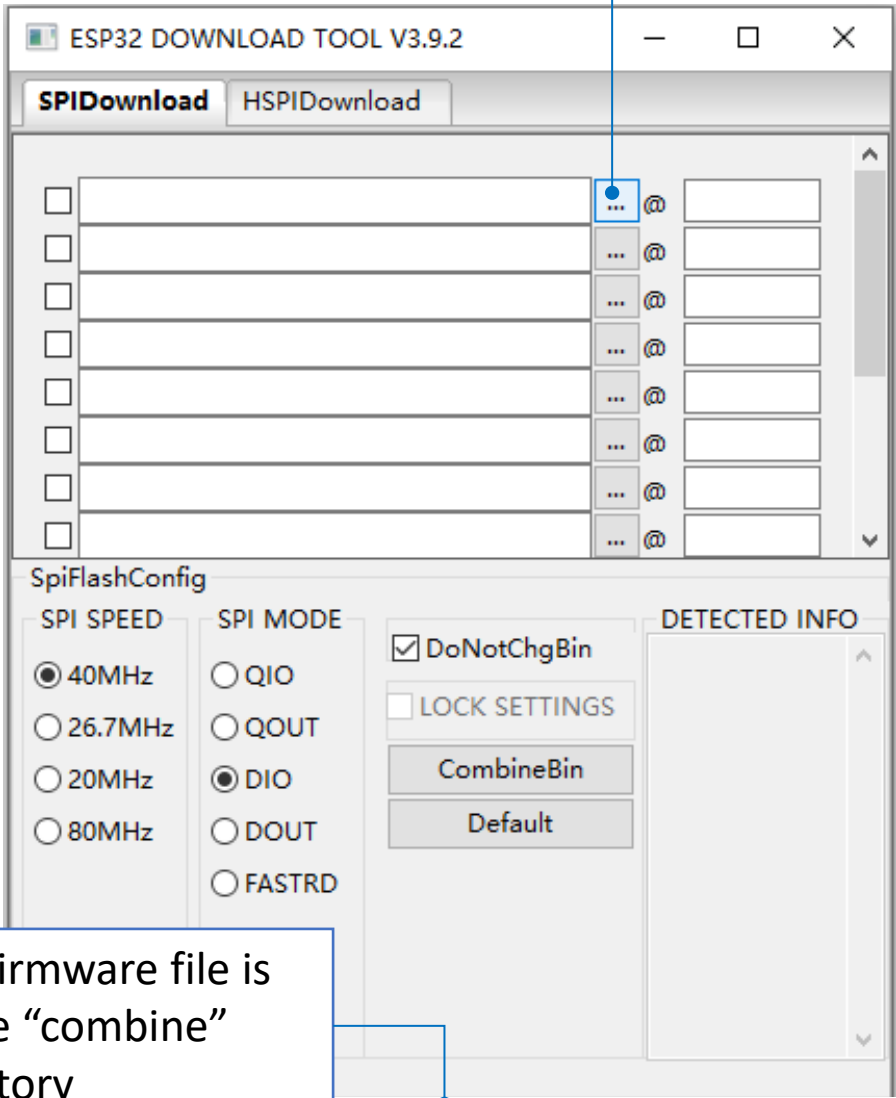

Firmware flashing software interface.

Firmware Update

Firmware Update

④ Open Firmware File

The firmware file is in the “combine” directory

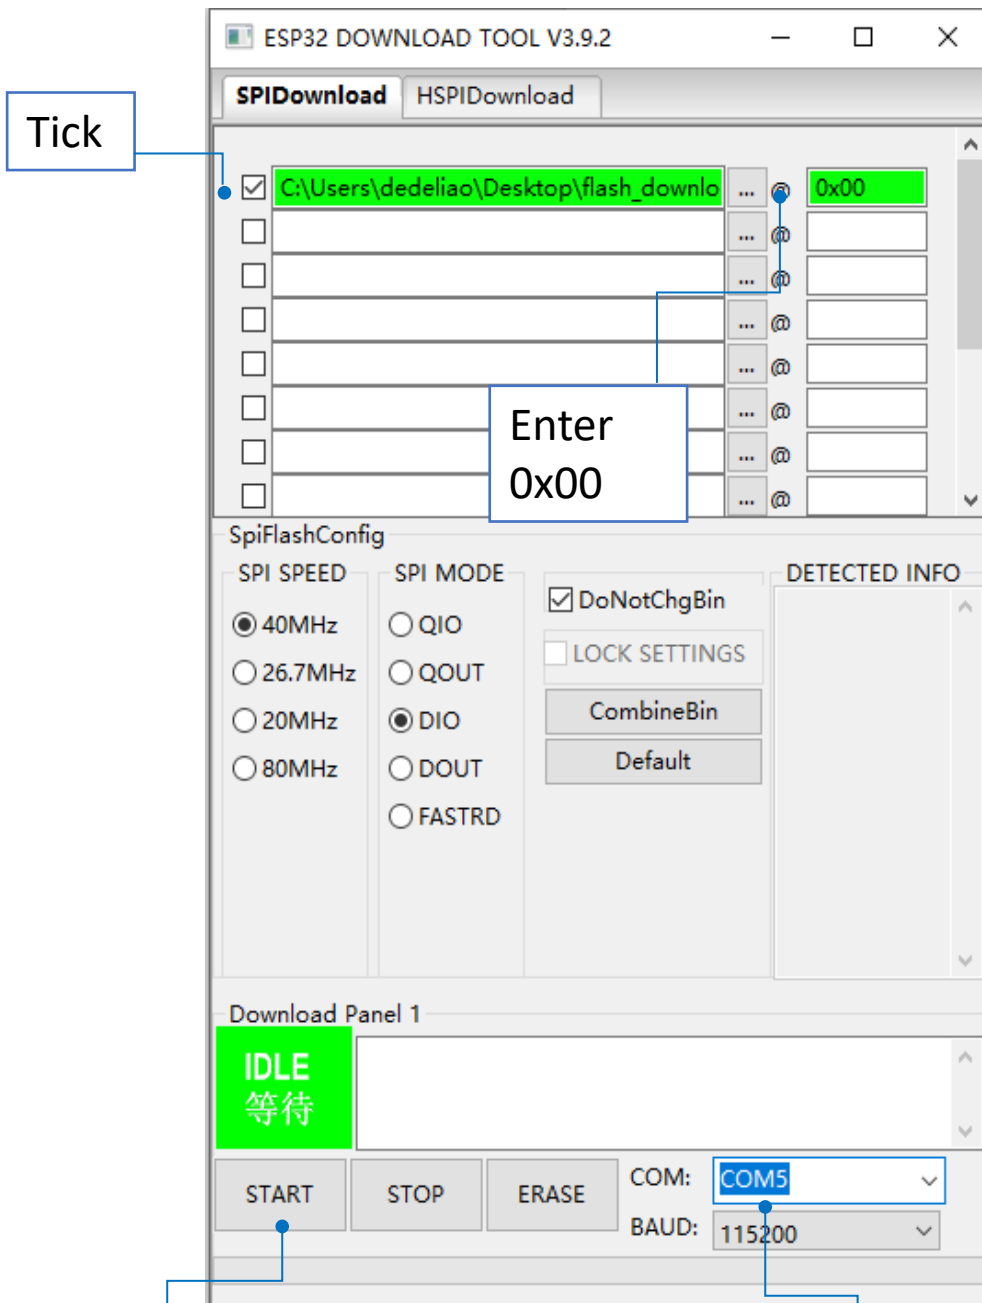

电脑 > 桌面 > flash_download_tool_3.9.2 > combine

名称	修改日期	类型	大小
EM31onstep211228.bin	2021/12/27 20:56	BIN 文件	1,035 KB

Firmware Update

Firmware Update

⑤ Set parameters as shown in the figure below

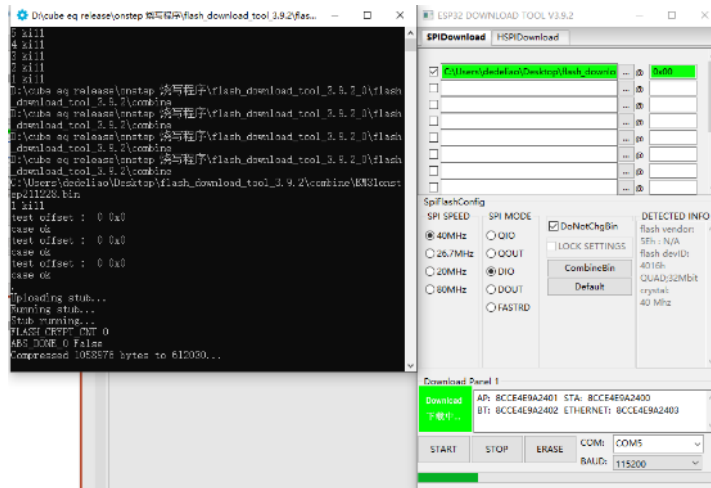

⑥ After setup, click "START" to flash the firmware.

Select serial port

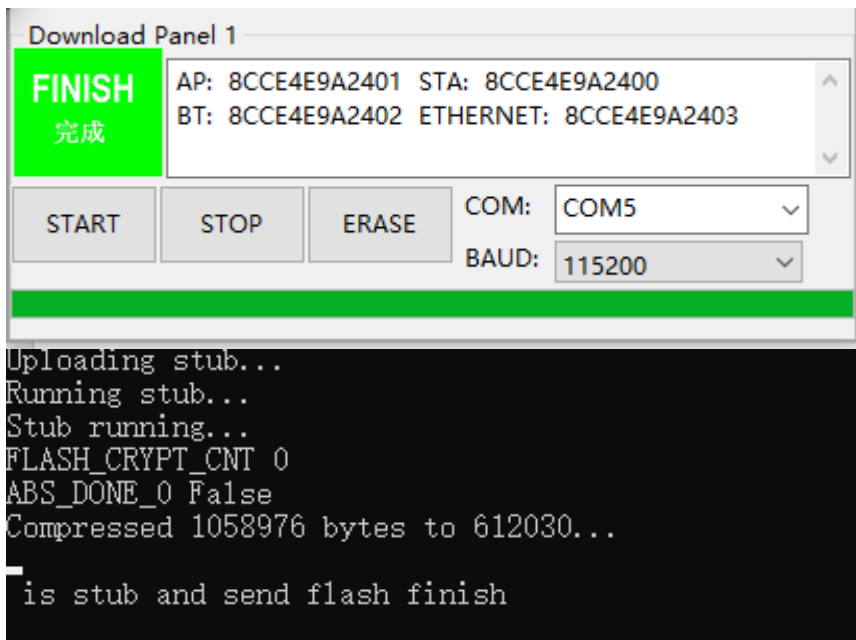

Firmware Update

Firmware Update

Firmware flashing begins.

Flashing complete, status bar shows "is stub and send flash finish.

⑦ After the firmware update, disconnect all connections (including the 12V power supply and USB cable) for 6 seconds, then reconnect the power to resume normal operation.

⚠ Note: After the firmware update, some existing settings, such as GOTO speed, may be changed. Please check and reset them as needed before using the mount.

Warranty Statement

Warranty

Thank you for purchasing the EM31Pro Strain Wave Mount. To ensure you have the best experience with our product, we provide a two-year warranty service for the EM31Pro. Below are the specific warranty terms and conditions:

Warranty Period

This product is covered by a two-year warranty starting from the date of purchase.

Warranty Coverage

During the warranty period, if the product exhibits any material or workmanship defects under normal use, we will provide free repair or replacement services. This includes, but is not limited to:

- Motor failure
- Control board failure
- Mechanical structure damage

Warranty Exclusions

The warranty does not cover the following situations:

- 1. Human-induced damage:** Including but not limited to damage caused by dropping, impact, submersion, excessive use, etc.
- 2. Unauthorized repair or modification:** If the product has been repaired or modified by an unauthorized service provider, the warranty will be void.
- 3. Accidents or natural disasters:** Including but not limited to fire, earthquake, flood, lightning, etc.

Warranty Statement

Warranty

4. Normal wear and tear: Such as normal wear and tear, scratches on the exterior, etc.

Warranty Service Procedure

1.Contact Customer Service: If your product requires repair, please first contact the after-sales service of the purchase channel or directly contact our customer service center. Provide a detailed description of the fault.

2.Fault Diagnosis: We will conduct a preliminary diagnosis of the reported fault via email. If further inspection is needed, we will guide you to send the product to the designated repair center.

3.Repair or Replacement: Once the product is confirmed to be within the warranty conditions, we will provide free repair services. If the product cannot be repaired, we will replace it with the same model or an equivalent product of the same value.

4.Return Shipping: The repaired or replaced product will be shipped back to you via courier.

Important Notes

- Before sending the product, please ensure it is properly packaged to avoid further damage during transit.
- When shipping, include a description of the fault.

If you have any questions or need further assistance, please feel free to contact our customer service team. We are dedicated to serving you.

Customer Service Email: support@easeastro.com

Thank you for your understanding and support.
