EM31PRO
STRAIN WAVE MOUNT
USER MANUAL V2.3

EMCAN

www.emcanastro.com

Reading Tips

Reading Interpretation

Thank you for choosing EM31Pro Strain Wave Mount.

The manual is based on the factory default specifications. Therefore, some specifications or appearance of your mount may be different. This manual is subject to change without prior notice.

The manual can still be used as a guide when there are differences in appearance or structure but no substantial differences in function or the use methods.

In order to ensure proper use of the mount, please read this user manual carefully before starting to use

Symbol Description

⊘ forbidden   ⚠ Important points   💡 Operation instruction

Blue stands for counterclockwise rotation

Green stands for clockwise rotation

Observe in the direction indicated by the dashed arrow.

Reading Tips

Security precautions

⚠ Please install and use the mount in strict accordance with the steps and precautions reminded in this manual, operators shall be responsible for any damage to the equipment or personal injury caused by improper operation.

⚠ Ensure the mount's time, coordinates, and home position are properly set before use. Incorrect settings can cause GOTO errors or equipment collisions.

⚠ After installation, carefully check for any interference. Collisions can damage components, causing malfunctions or accuracy issues. Unplug immediately if interference or emergencies occur.

⚠ Please be careful when you carry, assemble or disassemble the mount and other heavy components and other equipments used on the mount . Or it may cause damage to the equipments or even personal injury.

⚠ Please ensure the entire setup is placed on a stable, flat surface and confirm the tripod has enough capacity and support area to prevent tipping, which could cause equipment damage or personal injury.

⚠ If there are children around when using, please pay attention to protecting their safety

⚠ The operating temperature of this mount ranges from -15°C to 40°C. Please use the mount reasonably under proper environmental conditions

⚠ Do not wipe the surface with corrosive liquid. Avoid water immersion and exposure to rain.

⊘ Unauthorized disassembly is strictly prohibited. Any self-disassembly will result in the warranty being voided.

Contents

Product Overview

The EM31Pro Stain Wave Mount uses **17+17 strain wave reducers**. It is a **lightweight** mount but with a **high payload** capacity and **high-precision**. The EM31Pro supports **three modes**: EQ mode, Alt/Az side mode and Alt/Az top mode.

Mode	Astrophotography	Visual - telescope	Visual- Binoculars
EQ Mode	All objects	Yes	——
Alt/Az Side	Planets,Sun,Moon	Yes	——
Alt/Az Top	Planets,Sun,Moon	Yes	Yes

The different modes cater to the needs of both astrophotographers and visual observers.
Its **compact and lightweight design** makes transportation to your photography or viewing location effortless.
The **innovative altitude adjustment mechanism** provides an exceptionally **smooth experience for polar alignment**
The **quick-installation system** simplifies setup, allowing you to begin observing or capturing images faster.
Thoughtful **cable management** ensures tidy wiring and prevents tangling.
The **ergonomic design** enhances user comfort.
Crafted with **precision and premium materials**, the mount combines durability and elegance.

At EMCAN, we are dedicated to delivering a seamless experience, exceeding the expectations of astronomy enthusiasts.

Product Overview

Specification

1. **Weight of the main body：**　approx. 4kg（without Dovetail & adapter）
2. **Payload：**　　　　　　　≤15kg (without counterweight)
　　　　　　　　　　　　　　≤20kg (with counterweight)

Note: payload calculated in the condition that the telescope's center of gravity is 20cm from RA axis

3. **Latitude adjustment：**　0°~90°（fine adjustment +/-10°）
4. **Azimuth adjustment：**　-8°~+8°
5. **RA：**　　　　　　　　17 type 100:1 SWG+ Synchronous Belt
　　　　　　　　　　　　　（300:1 reduction ratio ）
6. **DEC:**　　　　　　　　 17 type 100:1 SWG+ Synchronous Belt
　　　　　　　　　　　　　（300:1 reduction ratio ）
7. **Motor:**　　　　　　　 42 Closed-loop stepper motor（RA with Brake）
8. **Goto speed：**　　　　 max 6°/s
9. **Power port：**　　　　 DC5.5-2.1 12V 5A（Cable Management Support）
10. **Power consumption：**　 tracking 0.4A，Goto 0.7A
11. **Communication interface：** usb2.0，Wi-Fi，Bluetooth
12. **Support:**　　　　　　 Asiair、ASCOM（NINA、PHD2）、INDI、SkySafari
13. **Dovetail：**　　　　　 Vixen 75° & LOSMANDY 60°；Arca(Optional)
14. **Home position：**　　 by bubble levels
15. **Mode：**　　　　　　 Equatorial mode; Altazimuth mode（side &top）
16. **Hand controller：**　 Wired hand controller

⚠ The payload capacity is not exactly equal to the total weight of the equipment being mounted. The effective weight that the mount can support depends closely on the center of gravity of the entire setup. Equipment with a higher center of gravity will reduce the mount's load-bearing capacity accordingly.

Before installing heavy equipment with a high center of gravity, please refer to the EM31Pro load formula to ensure it does not exceed the weight limit.
Product Overview

Standard Packing

1	EM31 Pro Body	**X1**
2	Hand Controller	**X1**
3	Dovetail（VIXEN & LOSMANDY）	**X1**
4	Adapter	**X1**
5	0.5m USB2.0 Cable	**X1**
6	2m USB2.0 Cable	**X1**
7	Shockproof Soft Bag	**X1**

Product Overview
1. Dovetail
2. DEC 12v DC 5.5*2.1
3. DEC Hand controller port
4. DEC USB port （type A）
5. Main altitude locking knob
6. Azimuth adjustment knob
7. Altitude fine adjustment knob
8. Auxiliary altitude locking knob
9. Bubble level for DEC axis
10. Bubble level for RA axis
11. Multifunctional front support
12. Counterweight bar interface
13. Mode indicator light
14. Mode switching button
15. Battery cover plate
16. USB port （type A ）
17. Ball head interface
18. 12v DC 5.5*2.1 power port
19. Hand controller port
20. Telescope directional mark

Product Overview

The standard dovetail of EM31Pro can be replaced, and the installation dimensions of the dovetail are as follows:

⚠️
EM31Pro supports counterweight bar with a diameter less than 20mm, and with length less than 300mm, the counterweight should be no more than 5kg

⚠️

The screw thread length of the counterweight bar shall not exceed 12mm

Product Overview

EM TC44S Tripod

RP200 Extension Rod

AD120 Horizontal Adjuster

TC44A (TC44S+AD120)

TC44L (TC44S+RP200)

TC44U (TC44S+AD120+RP200)

Parameters：			
Tripod interface：85mm	**Locking method：3/8+three screws locked**		
Carbon fiber tube diameter：44mm	**Carbon fiber tube thickness：2mm**		
Storage length：	EM-TC44S 620mm		
	EM-TC44A 720mm		
	EM-TC44L 850mm		
	EM-TC44U 950mm		

Size：		
Unfolded height:	EM-TC44S 530mm	
	EM-TC44A 620mm	
	EM-TC44L 720mm	
	EM-TC44U 810mm	
Weight：	EM-TC44S approx. 2.5kg	
	EM-TC44A approx. 3.4kg	
	EM-TC44L approx. 3.3kg	
	EM-TC44U approx. 4.2kg	

⚠ This accessory needs to be purchased separately

Product Overview

EMH150 Fast-assembling pier extension

**Material: Aluminum(AL6061),
Stainless steel
Size: H150mm dia110mm
Weight: 1.2kg**

⚠ This accessory needs to be purchased separately

Product Overview

Optional Accessories：

EMH200 Fast-assembling pier extension

Material: Aluminum(AL6061), Stainless steel

   coordinates
        ↓
※ Horizontal adjustment
        ↓
※ Mode confirmation
        ↓
※※ Set home position
        ↓
Select target and Goto
        ↓
Using Target Calibration
        ↓
Start observation
```

⚠ **Ensure the site coordinates, time, and home position are set correctly to avoid GOTO errors or equipment collisions.**

For OnStep, South latitude & East longitude (-); North latitude & West longitude (+); UTC: East of the prime meridian (-), West (+),

EM31Pro retains coordinates and time; no reset is needed if unchanged.

The mount remembers its last power-off position as the "home position". Be sure to either return the mount to the correct home position before shutting it down, or manually reset the home position after each power-on.

Standard Use Procedure

Use Procedure

Home position of Altazimuth Mode (Side & Top)

The home position of the Altazimuth mode is shown in the diagram below, and the telescope points to the NCP.

NCP
The home position can be confirmed through a mobile compass and bubble levels

Installation and Use

Installation of the mount with pier extension and tripod

EM 31 Pro can be mounted on center-column-free tripods with a bore diameter of 85 mm, such as RT90C, Gitzo5

⚠️ **Size and style of the 3/8-16 locking screw should be proper.**

Locking knob

Locking knob

Diameter 85mm

⚠️ **Ensure that non-official tripods are compatible with the mount and securely attached, with no wobbling or movement, to avoid precision issues or potential equipment falls.**

Installation and Use

Installation of the mount with pier extension and tripod

The standard setup does not include accessories for mounting the EM31Pro on non-compatible tripods. Users who wish to install the mount on a different tripod will need to design and fabricate a custom adapter and appropriate mounting bolts. **The dimensions should follow the chart below：**

Ø110

Outer diameter
less than 110mm

3/8-16 ▽ 12

Adapter

Screw

Wash

2

12

24

28.5

20

Ø85 +0.05 0
Correct adapter structure

⊘
Incorrect adapter structure, it is prohibited to connect to the mount through only one plane

Installation and Use

When using the EMTC44 tripod, the mount body can be directly attached to the tripod via the officially supplied adapter and secured with the tripod's three knobs for a more reliable connection.

Auxiliary locking knob

Tripod main locking knob
Installation and Use

Installation of the mount with pier extension and tripod

The EMTC44S is a high-load tripod specifically designed for astronomical applications. Its rigidity is enhanced by a non-retractable structure crafted from 44mm/2mm carbon fiber tubes. Additionally, the tripod's height and support area can be extended using the heightening section.
Rotate clockwise to install the extension rod and horizontal adjuster

Installation and Use

Installation of the mount with pier extension and tripod

The strain wave mount is compact, and when using a longer telescope, there is a risk of collision between the telescope and the tripod, especially near the zenith or the meridian. In this case, a pier extension is needed to avoid collisions.

pier extension

collision

Installation and Use

Installation of the mount with pier extension and tripod

Installation steps with the pier extension

Rotate the three auxiliary locking knobs of the tripod counterclockwise until the pier extension can be smoothly installed into the tripod tray

auxiliary locking knob
Installation and Use

Installation of the mount with pier extension and tripod

Installation steps with the pier extension

💡
Gently Push up the main tripod locking knob and rotate it clockwise until the knob and pier extension cannot rotate relative to each other

⚠️
Note that if this step is not performed correctly, the mount body and pier extension may not be separated properly when disassembling the equipment.

Main locking knob

Installation and Use

Installation steps with the pier extension

💡

Place the mount body with the adapter into the pier extension
Installation and Use

Installation of the mount with pier extension and tripod

Installation steps with the pier extension

💡 Push upward and continue rotating the main tripod locking knob clockwise until it is tightly secured.

Next, rotate the three auxiliary tripod locking knobs clockwise until they are firmly locked.

At this point, the installation of the mount body, pier extension, and tripod is complete
Push

💡 To lock the mount body, first push the main locking knob upward with slight force, then rotate the knob clockwise to secure it.

Installation and Use

Altitude coarse adjustment

auxiliary   **main**

Step1.Rotate
counterclockwise
to release the
auxiliary altitude
locking knob

⚠️

Rotate one to one
and a half turns
until it loosens,
avoid over-rotation
Step2.Rotate the main altitude locking knob
counterclockwise until the two pairs of flat
gears are completely separated. At this point,
the altitude angles can be freely adjusted

⚠️ **When the main altitude locking
knob is loosened, the mount
loses its support. During the
coarse adjustment process,
ensure that the mount is always
supported by hand until the
main altitude locking knob is
securely tightened again.**

90°

Installation and Use

Altitude coarse adjustment

💡 Refer to the altitude scale and adjust the altitude angle to approximately match the local latitude. (For example, if the local latitude is 31°13'20", set and lock the altitude near 30°

⚠️

When the main altitude locking knob is loosened, the mount loses its support. During the coarse adjustment process, ensure that the mount is always supported by hand until the main altitude locking knob is securely tightened again.

⚠️

Roughly adjust the altitude angle at 10 ° intervals, such as 0 ° 10 °, 20 °, 30 °... 90 °

Installation and Use

Altitude coarse adjustment

💡 Rotate the main altitude locking knob clockwise at the approximate latitude position until the flat gear engages. Then, rotate the auxiliary altitude locking knob clockwise to complete coarse adjustment of the altitude angle

CORRECT

WRONG

⚠️
Note that the flat gear must engage correctly, as shown in the left diagram. Incorrect engagement may cause the equipment to slip

Altitude angle coarse adjustment completed

⚠️

When the main altitude locking knob is loosened, the mount loses its support. During the coarse adjustment process, ensure that the mount is always supported by hand until the main altitude locking knob is securely tightened again.

Installation and Use

Adjustment of altitude and azimuth angles of the equatorial mode

Precise alignment of polar axis

1. For astrophotography, polar calibration can be completed through plate solving
2. EM31 Pro supports the installation of Pole master or iPolar to complete polar calibration

Adapter for electronic polar alignment scope

Once all equipment is installed, precise polar alignment can be achieved by rotating the azimuth adjustment knobs and altitude fine adjustment knob

Accessory Installation

Dovetail

The interface on the EM31Pro DEC top plate is compatible with most dovetails, allowing users to replace the dovetail as needed.
Accessory Installation

Dovetail

The EM31Pro comes with standard LOSMANDY 60° and Vixen 75° dovetail compatibility. Arca specifications can be achieved by installing the dovetail Acra strips (optional)

LOSMANDY

VIXEN

ARCA(optional)
Installation and Use

Structure Switching

The installation method for the EM31Pro pier extension and tripod in altazimuth mode is identical to that in equatorial mode. Adjust the altitude angle to 90 degrees using the same procedure as in equatorial mode.

Installation and Use

Installation of telescope

Confirm that the installation direction of the telescope is consistent with the direction marked on the bottom of the body. **Installing the telescope in reverse can result in GOTO errors and may even lead to collisions that could damage the equipment.**

Installation and Use

Horizontal calibration

Accurate GOTO and stable tracking in altazimuth mode require the azimuth rotation axis to be perpendicular to the ground. The EM31Pro allows users to confirm this alignment using the horizontal bubble on the RA axis.

Installation and Use

Horizontal calibration

When using the AD120 horizontal adjuster, the level state can be achieved by adjusting the horizontal adjusters
⚠️ All equipment need to be installed before starting to adjust the level state

Installation and Use

Horizontal calibration

Obtain accurate horizontal state

💡 Power on the mount and manually rotate the RA axis until the horizontal bubble is parallel to the blue horizontal adjuster line shown in the diagram.

💡 Adjust the two horizontal adjusters inside the blue circles until the horizontal bubble is centered

Installation and Use

Horizontal calibration

Obtain accurate horizontal state

💡 Manually rotate the RA axis until the horizontal bubble aligns with the red dashed line in the diagram.

💡
Adjust the horizontal adjuster inside the red circle until the horizontal bubble is centered, indicating that the horizontal adjustment is complete.

Installation and Use

Structure Switching

EM31 Pro can achieve the altazimuth top mode by installing a supporting bracket on top

Installation and Use

Top mode supporting bracket structure

1.Bracket Body

2.Rod locking knob

3.Side support rod

4.Rod support seat

5.Mounted rod

6.Rod sleeve

7.Rod sleeve locking handle
Installation and Use

Structure Switching

The supporting bracket interface is compatible with most dovetails.

⚠️ Pay attention to the installation direction of the dovetail knobs, as shown in the diagram.
⚠️ The top mode supporting bracket does not come with a dovetail, you can use the dovetail on the EM31Pro body or choose your own.

Installation and Use

Structure Switching

💡 Replace the dovetail on the mount body with a supporting bracket connecting adapter and adjust the altitude angle to 0 degrees
Installation and Use

Structure Switching

Invert the mount body and install it with the pier extension and tripod, following the same steps as in Equatorial mode.

Installation and Use

Structure Switching

💡 Insert the supporting bracket into the mount body base and rotate the knob clockwise until it is locked. Then, rotate the Rob support seat(4) clockwise until it reaches the bottom but do not lock it tightly

(4)
Installation and Use

Structure Switching

🔆 Adjust the altitude fine adjustment knob until the lower edge of the top-mount bracket is parallel to the edge of the mount body's base.

altitude fine adjustment knob
parallel

🔆 Adjust the azimuth knob until the side edge of the top-mount bracket is parallel to the edge of the mount body's base.

Azimut knob
parallel

⚠️ Parallel alignment of the edges can be determined by adjusting the viewing angle.

Installation and Use

Structure Switching

Clockwise into the Side support rod
Installation and Use

Structure Switching

Turn the Mounted rod(5) into the Side support rod(3), and rotate the Rod sleeve locking handle(7) clockwise to lock it. After locking, hold the Mounted rod(5) tightly and rotate it clockwise to lock the Side support rod(3) again

Secondary locking

(7)

(5)

(3)
Installation and Use

Structure Switching

💡

Loosen the Rod sleeve locking handle(7) counterclockwise and press the Mounted rod(5), while aligning the Mounted rod(5) with the Rod support seat(4) and releasing the Mounted rod(5)

(4)   (5)   (7)
Installation and Use

Structure Switching

💡

Rotate the Rod sleeve locking handle(7) and Rod locking knob(2) clockwise

Rotate Rod support seat(4) counterclockwise half a turn to one turn to fully lock the Mounted rod(5) and complete the installation of the top mode supporting bracket

(2)

(7)

(5)

(4)
Installation and Use

Telescope installation

Install the telescope into the upper dovetail, ensuring that the installation direction of the telescope is consistent with the direction marked on the top mode supporting bracket, **Installing the telescope in reverse can result in GOTO errors and may even lead to collisions that could damage the equipment.**
Installation and Use

Level adjustment

The top mode is Altazimuth mode, it is necessary to adjust the horizontal state. Accurate horizontal state can be obtained through horizontal bubbles on the DEC axis
DEC axis level bubble

☀ Complete the horizontal adjustment by adjusting the horizontal adjuster installed on the tripod, using the same method as in the side-mounted Alt-Az mode.

Installation and Use

Cable Connection

EM31 Pro has two sets of cable ports, located on the base of the mount and on the DEC rotation axis, both with identical functions.

USB 2.0
Type A

H.C
YC8 6

DC 5.5-2.1
12V
⊘ **Do not connect two power sources simultaneously.**
Do not connect two hand controllers simultaneously.
Do not connect two astronomical control devices simultaneously (such as any PC, astronomy box, or Mini PC).

Installation and Use

Power connection method

EM31Pro features two DC 12V ports. Either port can serve as a power input, while the other can be used as a power output to supply power to other astronomical devices.

For astrophotography, it is recommended to use the port on the base of the mount as the power input and the DEC axis port as the output.

DC5.5 2.1
12V output

DC5.5 2.1
12V input
Do not connect two power sources simultaneously. The load on the output port must not exceed 12V 5A.

When powering only the mount, it is recommended to use a DC 12V 2A power supply or higher. When powering other devices as well, use a DC 12V 5A power supply or higher.

Installation and Use

USB cable connection method

EM31 Pro has two USB ports, each capable of connecting the mount to a control device (such as a PC, astronomy box, Mini PC).

💡 For astrophotography, it is recommended to connect the astronomy box or PC to the DEC axis port . This allows the USB and power output cables to rotate in sync with the telescope, effectively preventing cable tangling.
Connection of an astronomy box or PC for astrophotography

🚫 Prohibit connecting devices other than PCs, Astro Boxes, and Mini PC...
Do not connect the mount through any USB hub.

Installation and Use

Cable Connection

Handle connection

EM31 Pro has two handle controller ports, each capable of connecting the handle controller

Handle connected to the bottom of the mount in EQ and Alt/Az side modes.
Handle connected to DEC axis cable management in Alt/Az top mode

⊘ **Prohibit connecting two handle controllers simultaneously Do not plug and unplug the handle controller while the mount is powered on**

Installation and Use

Mode selection

EM31 Pro mode selection indicated by the "Type" light，
Blue is Altazimuth side-mounted mode， **Red is Altazimuth top-mounted mode,** **Light out for Equatorial mode**

Wait for 5 seconds when the mount is powered on, and enter mode switching after the Status light flashes off	By clicking the Switch button, the Type light will begin to change, blue-red-off, and the Type light will be switched once per key press, which can be switched cyclically.	After confirming the required mode, wait for 10 seconds, the Status light will remain on after flashing, and the mode switch is complete
⚠ When the mount is in operation, the Status light will remain on and will start flashing once tracking is activated.

Accessory Installation

The electronic polar scope can be connected to EM31Pro via an adapter (optional accessory).

Adapter for iPolar
(the latest version)
Adapter for QHY Pole Master

Accessory Installation

Ball head adapter

EM31 Pro can mount a DSLR through the ball head adapter (optional), allowing for wide-field astrophotography while capturing astronomical images.

3/8 16 bolts

Battery Installation

Battery replacement

Battery model CR1220

💡 The battery stores the time and location coordinates. It is recommended to replace it every 12 to 18 months.

🚫 Do not replace the battery while powered on

OnStep Quick Start Guide

OnStep Guide

Android users can set and control the mount through OnStep APP or webpage

⚠️ **IOS system cannot use APP, webpage is workable**

🔆 **Connect to the web via WiFi:**

Search for WIFI hotspot OnStep connection through PC or mobile phone, password: password

Enter "192.168.0.1:9999" or "192.168.0.1" into the browser

OnStep Quick Start Guide

💡 For the first use or when using the mount at a new location, set the mount's latitude and longitude coordinates and local time (can be synced via NINA or Asiair)

Set time offset   **Latitude and longitude coordinates**

⚠️ In the OnStep system, east longitude is (-), west longitude is (+), north latitude is (+), and south latitude is (-). For UTC, east of the prime meridian is (-), and west is (+).

OnStep Quick Start Guide
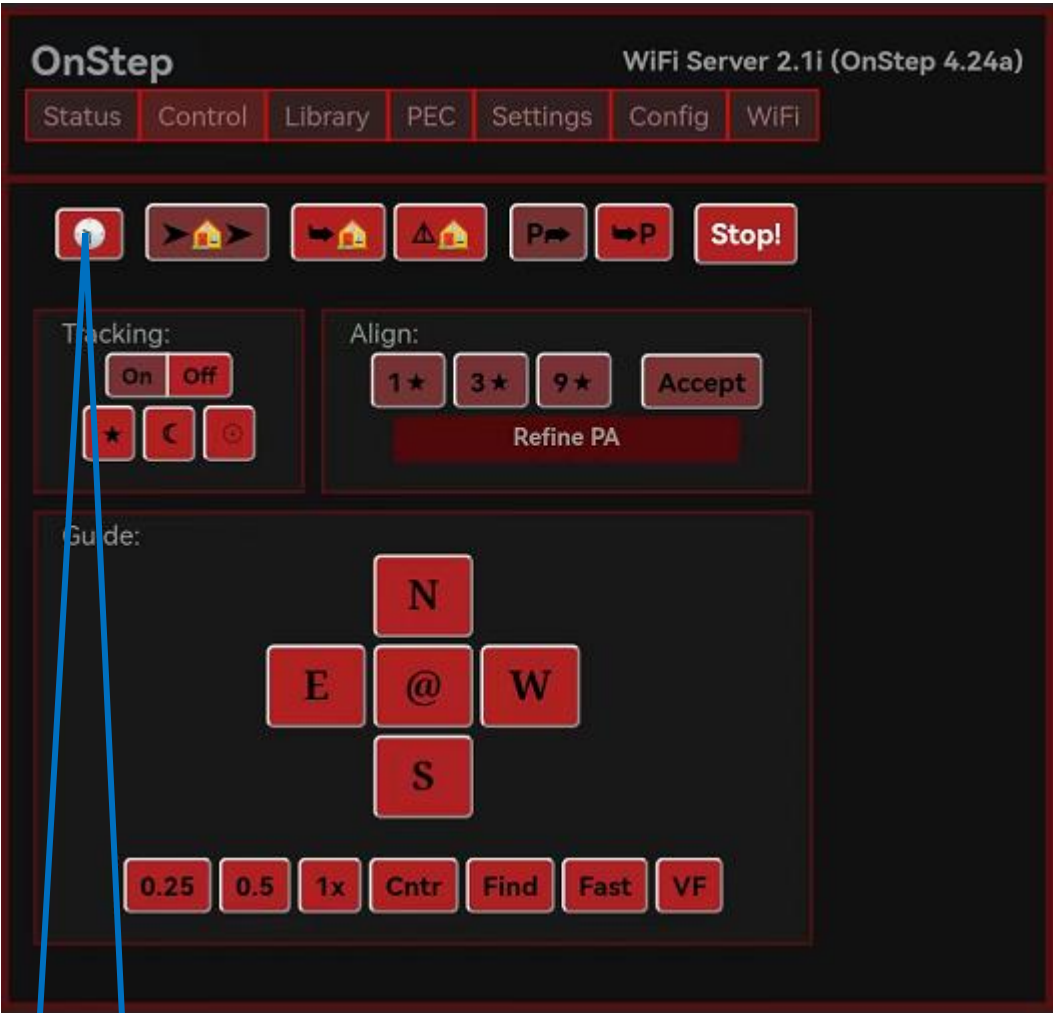

Set Time

set time

OnStep Quick Start Guide

OnStep Guide

Start Tracking
Turn on Tracking, and the rotation of the mount can be controlled by operating the direction keys.

⚠️ **OnStep system option, gray indicates ON status**

OnStep Quick Start Guide

⚠️ **The home position differs in the three modes of EM31Pro, so it should be set before using the mount**
After enabling tracking, manually rotate the mount to the home position, and click the "At Home" button to save the home position of the mount.

⚠️

Note: After setting the home position, the mount will return to the "Untracking" state. Click "Tracking ON" again to enable tracking

OnStep Quick Start Guide

⚠ **The home position is different in the three modes of EM31pro, so it should be set before using the mount**
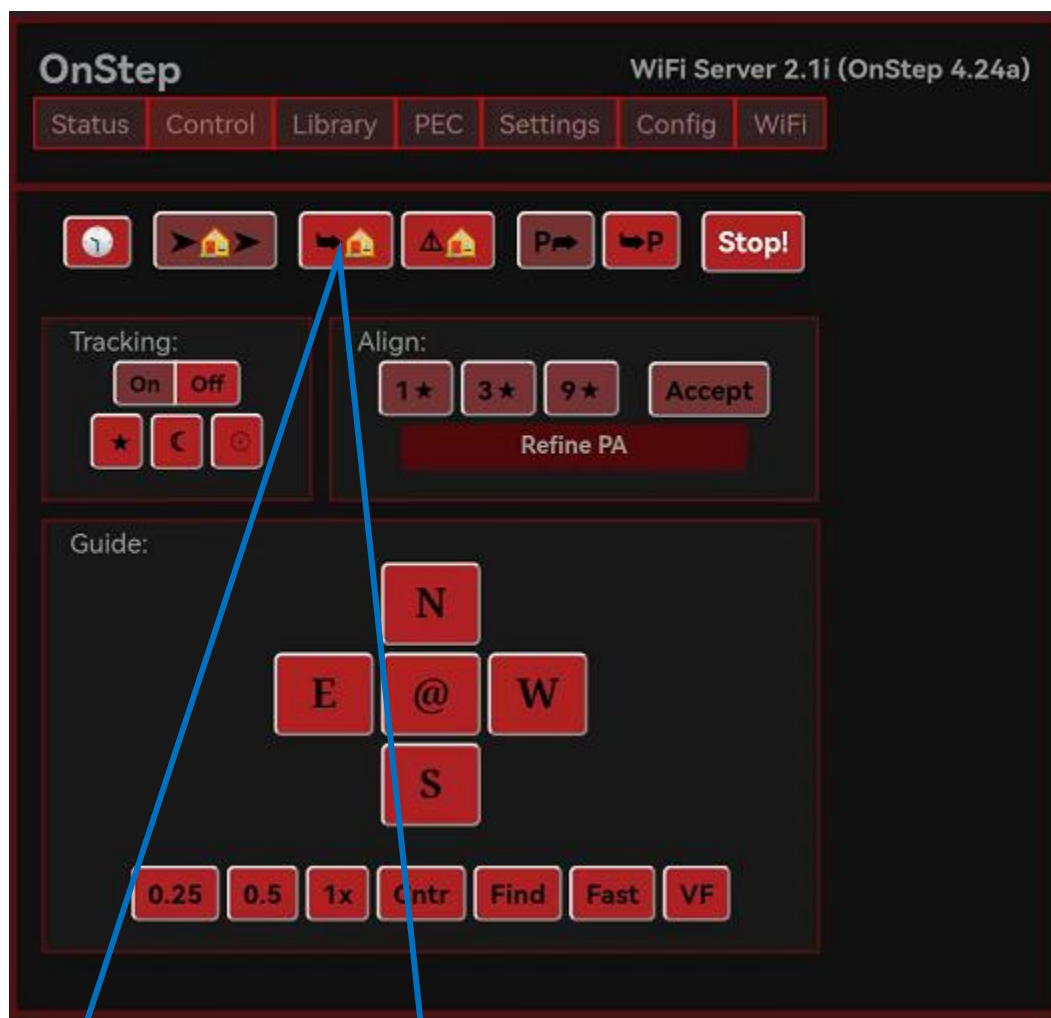

Click the "Go Home" button to return the mount to the home position.

⚠ **After powering off and on, the mount defaults to the power-on position as the home position. For accuracy, always reset the home position before each use. Alternatively, you can click the 'Go Home' button to return the mount to the home position before powering off, or, if using control software, configure the plan to execute the 'Go Home' command automatically after each session to avoid the need for a manual reset next time.**

OnStep Quick Start Guide

Limit position setting

Equatorial mode, DEC axis rotation limit

altitude angle limit in Altazimuth mode

⚠

Note : When the manual operation of the mount rotation exceeds the set limit, the mount will stop rotating, press the key again, the mount will only move a small angle.
Once the GOTO target exceeds the limit, GOTO will stop.
The limit position is related to the time, latitude and longitude coordinates and home position setting of the mount.
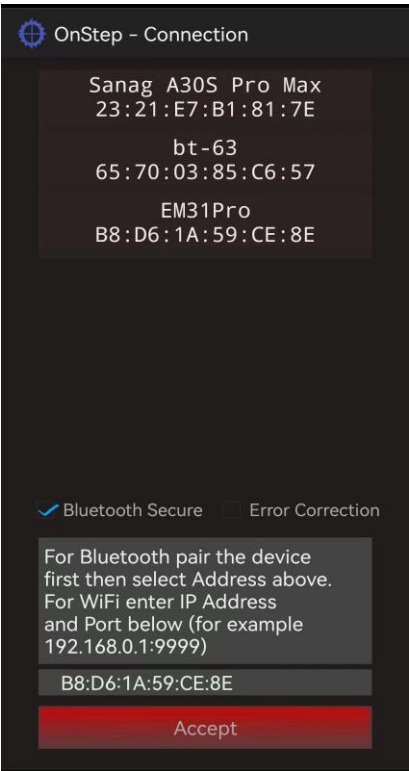

OnStep Quick Start Guide

💡 **Connect to the Android app via Bluetooth.**
(app only supports Android system, Apple system needs to be set through the webpage)

①Matching Bluetooth   ②Select Connection in the APP
③Choose Bluetooth   ④Complete connection
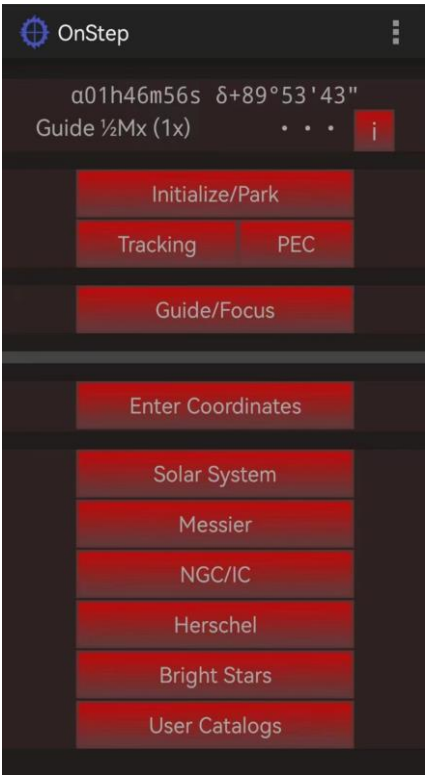

⚠️ **The first connection may be very slow. Please allow some time for the process to complete.**

OnStep Quick Start Guide

OnStep Guide

OnStep and ASIAIR connection

Mount selects "OnStep Electronics"
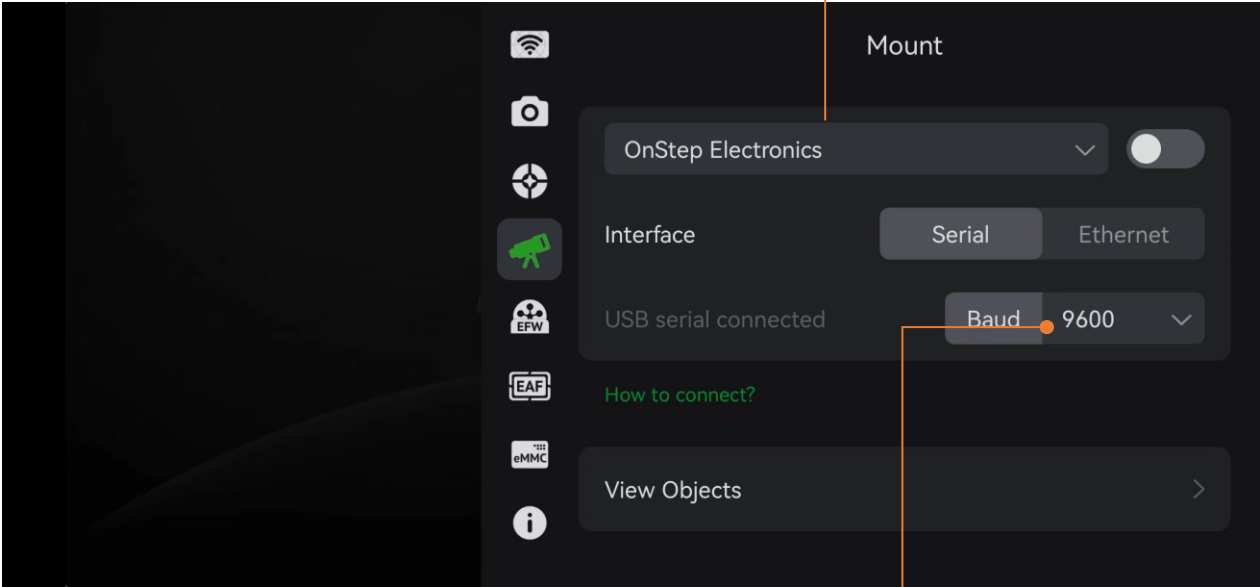

Serial port baud rate 9600

OnStep Quick Start Guide

OnStep Guide

OnStep and PC connection

Step ① **Installing the mount serial port driver cp2102**

🔆 **Confirm that the mount serial port connection is normal in Windows Device Manager**

Step ② **Install ASCOM platform**
https://www.ascom-standards.org/

Step ③ **Install OnStep ASCOM driver**
https://emcanastro.com/downloads/

OnStep Quick Start Guide

OnStep and PC connection

Select the correct serial port (check the correct port number in Device Manager) and connect the mount

SkySafari Connection

Scope Type:
Meade
LX200 Classic

Mount Type: Choose
Equatorial or Alt-Az
depending on EM31Pro
mode.

Scope Setup (?) ✕

EQUIPMENT SELECTION

Scope Type -- Meade LX200 Classic

Mount Type -- Equatorial GoTo (German)

COMMUNICATION SETTINGS

● Connect via Bluetooth (EM31Pro)

○ Connect via WiFi

COMMON SETTINGS

☐ Set Time & Location

☐ Tilt Device to Slew

☐ Save Log File

Readout Rate -- 4 per second

⚠ **Note:**
**Selecting to synchronize time and location information will slow
down the mount connection startup, adding approximately 30
seconds, please wait patiently.**

OnStep Quick Start Guide

SkySafari Connection

1. Via Bluetooth (Android only)

Pair with EM31Pro via Bluetooth.   Bluetooth settings, select EM31Pro.
⚠️ **Note:**
Using Bluetooth to connect to EM31Pro will take around 40–60 seconds to initiate the mount connection.

OnStep Quick Start Guide

SkySafari Connection

2. Via Wi-Fi (Android + Apple)

Connect to the mount's
Wi-Fi hotspot.

Enter the following details:
IP: 192.168.0.1   Port: 9999 or 9998.
Firmware Update

(Demonstrated using Windows 10)

① **Connect the device to the PC**

• If updating the Mount: Connect the mount to the PC via USB. If the PC's USB port provides insufficient power, please connect a 12V power supply to the mount.

• If updating the Hand controller**:** Simply connect the hand controller to the PC via USB. No need to connect the mount.

⚠ **Note:** The mount and hand controller use separate firmware files and do not require simultaneous updates.

② **Open the firmware flashing software.**

Firmware Update

⑤ **Set parameters as shown in the figure below**

Tick

Enter 0x00
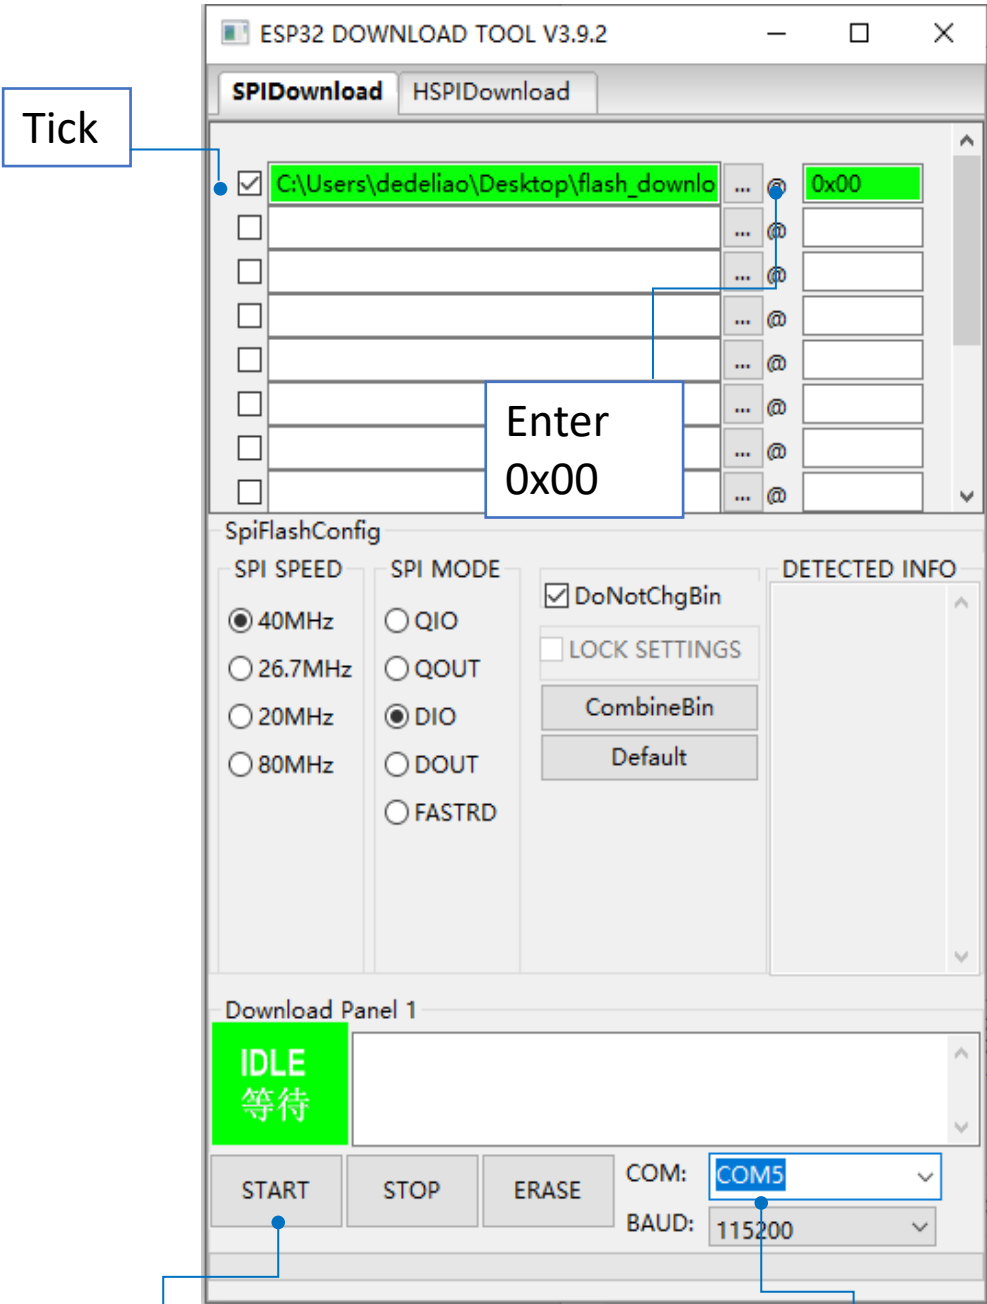

⑥

After setup, click "START" to flash the firmware.

Select serial port

Firmware Update

Firmware flashing begins.
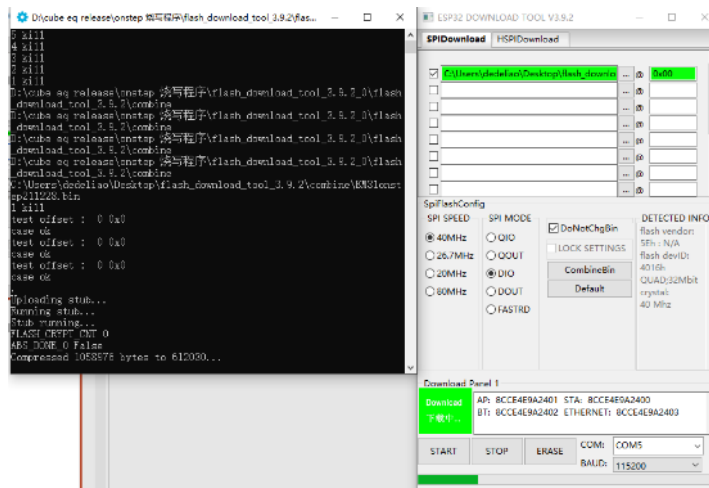

Flashing complete, status bar shows "is stub and send flash finish.
⑦**After the firmware update, disconnect all connections (including the 12V power supply and USB cable) for 6 seconds, then reconnect the power to resume normal operation.**

⚠ Note: After the firmware update, some existing settings, such as GOTO speed, may be changed. Please check and reset them as needed before using the mount.

Warranty Statement

Warranty

Thank you for purchasing the EM31Pro Strain Wave Mount. To ensure you have the best experience with our product, we provide a two-year warranty service for the EM31Pro. Below are the specific warranty terms and conditions:

Warranty Period

This product is covered by a two-year warranty starting from the date of purchase.

Warranty Coverage

During the warranty period, if the product exhibits any material or workmanship defects under normal use, we will provide free repair or replacement services. This includes, but is not limited to:

- Motor failure
- Control board failure
- Mechanical structure damage

Warranty Exclusions

The warranty does not cover the following situations:

1. **Human-induced damage**: Including but not limited to damage caused by dropping, impact, submersion, excessive use, etc.
2. **Unauthorized repair or modification**: If the product has been repaired or modified by an unauthorized service provider, the warranty will be void.
3. **Accidents or natural disasters**: Including but not limited to fire, earthquake, flood, lightning, etc.

Warranty Statement

4. Normal wear and tear: Such as normal wear and tear, scratches on the exterior, etc.

Warranty Service Procedure

1.Contact Customer Service: If your product requires repair, please first contact the after-sales service of the purchase channel or directly contact our customer service center. Provide a detailed description of the fault.

2.Fault Diagnosis: We will conduct a preliminary diagnosis of the reported fault via email. If further inspection is needed, we will guide you to send the product to the designated repair center.

3.Repair or Replacement: Once the product is confirmed to be within the warranty conditions, we will provide free repair services. If the product cannot be repaired, we will replace it with the same model or an equivalent product of the same value.

4.Return Shipping: The repaired or replaced product will be shipped back to you via courier.

Important Notes

- Before sending the product, please ensure it is properly packaged to avoid further damage during transit.
- When shipping, include a description of the fault.

If you have any questions or need further assistance, please feel free to contact our customer service team. We are dedicated to serving you.

Customer Service Email: support@easeastro.com

Thank you for your understanding and support.
